Publisher's note

After ten years of service, Laurence Weatherley will retire his position as Co-Editor of the Environmental Chemical Engineering section of the *Chemical Engineering Journal*. Throughout his tenure with the Journal, Laurence's wealth of expertise and experience in environmental chemical engineering has been instrumental in the handling of thousands of manuscripts submitted for publication. After joining CEJ in 2000, Laurence played a key role in acquiring special issues of only the most relevant and current research in addition to appointing several new members to the Editorial Board. He was later extremely instrumental in overseeing the editorial development of

the Environmental Chemical Engineering section of the journal, an endeavor that has contributed to the rapid growth of the journal in recent years.

In the time that I have worked with Laurence, I have found him to be continuously devoted to the authors and reviewers that contribute their time, effort and research to the Journal. I am very pleased that he will continue with CEJ as an Editorial Board Member. I look forward to our continued collaboration.

Dylan T. Parker
