

ADDITIONS AND CORRECTIONS

Bradley S. Davidson. Ascidiens: Producers of Amino Acid Derived Metabolites (*Chem. Rev.* **1993**, *93*, 1771–1791).

The final structure determination of the didemnins was carried out almost simultaneously by two research groups. Although not the first reports to reassign the structures of the originally proposed (2*R*,4*R*)-HIP (2*R*,4*R*-hydroxyisovaleryl propionate) and (3*S*,4*R*)-statine residues to (2*S*,4*S*)-HIP and (3*S*,4*R*,5*S*)-isostatine, respectively, the following references were among the first to be published in the general literature: Ewing, W. R.; Bhat, K. L.; Joullié, M. M. *Tetrahedron* **1986**, *42*, 5863. Harris, B. D.; Joullié, M. M. *Tetrahedron* **1988**, *44*, 3489.
