Gold(I)-Catalyzed Cyclizations of 1,6-Enynes: Alkoxy cyclizations and *exo/endo* Skeletal Rearrangements

Chem. Eur. J., 2006, 12

DOI: 10.1002/chem.200501088

The authors have recently found that the configuration of diene **64** (Ar = *p*-MeOC₆H₄) in Scheme 6 was incorrectly assigned. The major isomer has a *cis* configuration, whereas the configuration of related compounds **62** and **66** (Ar = Ph and *p*-O₂NC₆H₄) is *trans* as reported. The correct configuration is shown in the revised equation.

[Au]	<i>t</i> [h]	63:64 ratio	yield [%]
24e	0.5	1:7	90
25	0.5	1:5.5	53
