**Structural Importance of Secondary Interactions in Molecules: Origin of Unconventional Conformations of Phosphine–Borane Adducts**

*Chem. Eur. J.*, **2008**, *14*

DOI: 10.1002/chem.200700649

In the Full Paper by Erker and Grimme et al., published in the first 2008 issue of *Chemistry – A European Journal*, a small error has been noted. In Scheme 1, each  $\text{HB}(\text{C}_6\text{F}_5)$  should be replaced with  $\text{HB}(\text{C}_6\text{F}_5)_2$ . The authors apologize for this oversight.
