Nematic and Columnar Ordering of a PEG–Peptide Conjugate in Aqueous Solution

Chem. Eur. J., **2008**, *14*

DOI: 10.1002/chem.200800817

The corresponding author regrets that, due to an oversight, a reference to their related Communication “Multiple Lyotropic Polymorphism of a Poly(ethyleneglycol)-Peptide Conjugate in Aqueous Solution” (*Adv. Mater.* **2008**, DOI: 10.1002/adma.200800266) was omitted from the above Full Paper. The corresponding author sincerely apologizes to the readers, reviewers, and editors for failing to cite the related manuscript and for any inconvenience that may have been caused.
