

ERRATA

(*E*)- γ -BISABOLEN-8,9-EPOXIDE AND ISOCYCLOEUDESMOL, TWO NEW SESQUITERPENOIDS FROM THE MARINE RED ALGA *LAURENCIA NIPPONICA* YAMADA [*Chem. Lett.*, 1980 (10) pp. 1267-1270] by Teruaki SUZUKI, Hajime KIKUCHI and Etsuro KUROSAWA, Department of Chemistry, Faculty of Science, Hokkaido University, Sapporo 060.

On page 1268, the optical rotation of isocycloeudesmol, $[\alpha]_D +21.5^\circ$ (c; 2.10, CHCl_3), should be corrected; the correct value is $[\alpha]_D -32.3^\circ$ (c; 1.67, CHCl_3).
