

**National Science Foundation
Materials Chemistry Workshop
October 14–17, 1999
Minneapolis, Minnesota**

The organizing committee for the NSF-sponsored annual workshop on Materials Chemistry invites applications from individuals interested in participating in the 1999 workshop.

These workshops provide a forum for vigorous discussion of the latest results in the area of Materials Chemistry, including studies of the synthesis, characterization and properties of polymers, molecular crystals, inorganic solids, hybrid materials, biomaterials, and surfaces. Participants are selected on the basis of peer-reviewed applications, which consist of a one-page abstract of the proposed discussion topic, a one-page CV, and a list of publications for the last three years. The workshop is limited to 30 participants. The format consists of 15-minute presentations by each of the participants, with ample time for discussion. Partial reimbursement for expenses will be provided. To ensure full consideration, applications should be received by **May 1, 1999**, and should be sent to: Dr. E. A. Chandross, Bell Labs/Lucent Technologies, Room 1D248, 600 Mountain Avenue Murray Hill, NJ 07974.
