

# Additions and Corrections

---

2007, Volume 19

**Nathaniel L. Henderson, Jaewook Baek, P. Shiv Halasyamani,\* and Raymond E. Schaak\***: Ambient-Pressure Synthesis of SHG-Active  $\text{Eu}_2\text{Ti}_2\text{O}_7$  with a [110] Layered Perovskite Structure: Suppressing Pyrochlore Formation by Oxidation of Perovskite-Type  $\text{EuTiO}_3$ .

Please note the following correction to this communication (*Chem. Mater.* **2007**, *19*, 1883–1885).

We inadvertently missed citing a reference that describes the formation of lanthanide titanates using a process similar to that reported in our communication (Bazuev, G. V.; Shveikin, G. P. *Dokl. Akad. Nauk SSSR* **1982**, *266*, 1396). We thank Dr. G. V. Bazuev for bringing this to our attention.
