

COMPOSITION OF THE ESSENTIAL OIL OF *Stachys germanica* FROM SERBIA

S. Grujic Jovanovic,^{1*} P. D. Marin,¹
A. Dzamic,¹ and M. Ristic²

UDC 547.913

The genus *Stachys* L. comprises more than 270 species and is considered one of the largest genera of the Labiateae [1]. It is a subcosmopolitan genus centered in the warm temperate regions of the Mediterranean and SW Asia. Serbia is an area not very rich in *Stachys* representatives. In the flora of Serbia, 17 species are recognized [2]. Plants of this genus have long been used in folk medicine for the treatment of genital tumors, sclerosis of the spleen, inflammatory tumors, cough, and ulcers [3]. Teas prepared from the whole plant or leaves are used in phytotherapy. They possess sedative, antispasmodic, diuretic, and emmenagogue effects [4, 5]. In spite of the large species diversity of *Stachys*, the composition of essential oils is known in only a small number of species. Essential oils have been studied in different *Stachys* species [6–16].

As a part of a morphological, anatomical, and chemical research of genus *Stachys* in Serbian flora, we report the essential oil composition of *S. germanica*.

Seventy-three compounds were identified in the essential oil of *S. germanica*, which represents 92.87% of the total oil, through their retention indexes and mass spectra obtained using GC/MS. The components with their percentage peak area are listed in Table 1. The main components were borneol (9.27%), bicyclogermacrene (8.97%), β -farnesene (5.70%), and spathulenol (4.60%). *S. germanica* oil contains monoterpene hydrocarbons (0.96%), oxygenated monoterpenes (14.07%), sesquiterpenes (34.23%), and oxygenated sesquiterpenes (24.89%). The essential oil of this species contains also aliphatic hydrocarbons (14.33%) and diterpenes (1.63%).

TABLE 1. Chemical Composition of the Essential Oil of *S. germanica*

Compound	KI	%	Compound	KI	%
Unidentified	-	0.29	Linalool	1098	1.10
Unidentified	-	0.67	Undecane	1100	0.13
2,3-Dimethyl-2-butanol	-	4.07	Pinocarveol	1139	0.11
Pentanol	771	0.18	Camphor	1143	0.85
3-Methyl-3-pentanol	838	2.57	Car-3-en-2-ol	-	3.39
Hexan-3-ol	840	0.20	Borneol	1165	9.27
Benzaldehyde	961	0.42	Terpineol	1177	0.36
Methyl-2-hexenyl ether	-	0.43	α -Terpineol	1189	0.17
Oct-1-en-3-ol	978	0.78	Myrtenol	1194	0.27
β -Pinene	980	1.21	<i>trans</i> -Carveol	1217	0.91
2-Pentenyl furan	-	0.28	Ocimene	-	0.18
<i>n</i> -Decane	1000	0.07	Undecanal	-	0.23
Unidentified	-	0.21	<i>cis</i> -Carveol	1229	0.14
Unidentified	-	0.25	3-Hexenyl isopentanoate	-	0.20
1,8-Cineole	1033	0.18	Pulegone	1237	0.40
Octan-1-ol	1070	0.23	Hexyl 2-methyl butyrate	1234	0.37
Sabinene hydrate	1097	0.13	Myrtanol	1252	0.18
