The genus *Rhytidium*, which belongs to the family Rhytidaceae, consists of only 1 species – *Rhytidium rugosum* (Hedw.) Kindb. It grows from below the shrub forest, which is widely distributed in China, Korea, Japan, Russia (the Far East and Siberia), Europe, and North America [1].

Bryophyte has been used as herb medicine to treat trauma, empyrosis, infestation, pulmonary phthisis, eclampsia, pneumonia, and so on [2]. Recently, several chemical compounds from bryophyte were isolated, such as sesquiterpenoids, diterpenoids, biflavoids, bibenzys, bis-benzyls, and fatty acids, which had shown many biological activities such as antibacterial, antiseptic, antitumor, anticoagulant, and nerve protection [3–5]. However, *R. rugosum*, a bryophyte that can treat coronary heart disease, high blood pressure, nervous prostration, etc. [6], has not been studied as far as we know. In the present work, the essential oil from *R. rugosum* was investigated for further development and application.

The chemical and class composition of the oils are presented in Table 1. Thirty-one compounds (representing of 99.9%) in the essential oil and 58 compounds (representing of 98.8%) in the diethyl ether extract were identified by GC-MS. The identified components and their percentages are given in Table 1.

The essential oil consisted mainly of sesquiterpenes (87.4%). The major compounds were *n*-hexadecanoic acid (27.94%), linolenic acid (11.87%), *cis*-9, *cis*-12-octadecadienoic acid (9.56%), hexahydrofarnesyl acetone (8.65%), pentadecanoic acid (7.86%), Z-11-hexadecenoic acid (4.54%), tetradecanoic acid (3.57%), and tetradecanal (3.42%).

The main constituents in the diethyl ether extract were diterpenes (34.2%) and sesquiterpenes (34.5%). Ethyl oleate (8.67%) and τ -sitosterol (6.50%) were the most abundant components in the diterpenes and sesquiterpenes, respectively.

These experiments showed for the first time the chemical compositions of the essential oil from *R. rugosum*. The results showed that the main constituents were *n*-hexadecanoic acid (27.94%), linolenic acid (11.87%), and *cis*-9, *cis*-12-octadecadienoic acid (9.56%). Biological studies have reported that *n*-hexadecanoic acid is anti-thrombus and can prevent cardiovascular disease [7]. Linolenic acid has antibacterial, anti-HIV, anti-tumor, anti-inflammatory, anti-scleratheroma activities and can also be used to treat high blood pressure, premenarche syndrome, and diabetes [8, 9]. *cis*-9, *cis*-12-octadecadienoic acid can decrease the content of cholesterol and reverse atherosclerosis [10]. This study on the essential oil establishes a reliable basis for further investigations on *R. rugosum*. Other studies on the chemical compositions and biological activities of *R. rugosum* are underway.

TABLE 1. Chemical Constitutions in the Essential Oil and the Diethyl Ether Extract from *R. rugosum* (Hedw) Kindb

Compound	HD, %*	DE, %*	Compound	HD, %*	DE, %*
α -Caryophyllene	0.56	0.7	4,11,11-Trimethyl-8-methylenebicyclo[7.2.0]-undec-4-ene	-	0.19
α -Amorphene	0.21	0.25	Patchoulene	-	0.32
Eremophila-1(10),11-diene	0.19	-	β -Resorcytaldehyde,6-methyl-	-	0.33
α -Selinene	0.2	0.11	Hexadecane	-	0.2
τ -Cadinene	0.2	0.35	Limonen-6-ol pivalate	-	0.68
Cadina-1,3,5-triene	0.11	-	Eudesm-4(14)-en-11-ol	-	0.63
n-Dodecanoic acid	0.76	-	Diepicedrene-1-oxide	-	0.32
Caryophyllenyl alcohol	0.26	0.29	n-Nonadecane	-	0.34
Caryophyllene oxide	2.89	0.9	3,7,11,15-Tetramethyl-2-hexadecen-1-ol	-	1.27
1,5,5,8-Tetramethyl-12-oxabicyclo[9.1.0]-3,7-diene	1.29	-	4,4,8-Trimethyltricyclo[6.3.1.0(1,5)]-	-	0.42
trans-Longipinocarveol	3.04	-	dodecane-2,9-diol	-	
n-Heptadecanol	1.03	-	Palmitic acid	-	2.38
Z,E-2,13-Octadecadien-1-ol	1.2	-	5-(7 α -Isopropenyl-4,5-dimethyl-octahydroinden-4-yl)-3-methyl-pent-2-en-1-ol	-	0.52
Tetradecanal	3.42	-	n-Heneicosane	-	3.05
Tetradecanoic acid	3.57	-	7-Isopropyl-1,4 α -trimethyl-1,2,3,4,4 α ,9,10,10 α -octahydrophenanthrene	-	1.05
Pentadecanoic acid	7.86	-	Ethyl oleate	-	8.67
Hexahydrofarnesyl acetone	8.65	0.31	Octadecanoic acid	-	1.19
(Z)-7-Hexadecenal	0.97	-	Osthole	-	3.9
Z-11-Hexadecenoic acid	4.54	-	Eicosane	-	1.27
1-Hexadecen-3-ol,3,5,11,15-tetramethyl-	1.09	-	Eicosanoic acid	-	2.14
9-Hexadecenoic acid	0.54	-	Tetracosane	-	1.76
n-Hexadecanoic acid	27.94	0.52	Phytol	3.11	4.03
Arachidonic acid methyl ester	1.08	-	cis-9,cis-12-Octadecadienoic acid	9.56	1.39
Z-(13,14-Epoxy)tetradec-11-en-1-ol acetate	0.73	-	Linolenic acid	11.87	5.29
Phytol	3.11	0.53	Labd-14-ene-8,13-diol,(13R)-	0.58	4.13
cis-9,cis-12-Octadecadienoic acid	9.56	-	3-Ethyl-5-(2'-ethylbutyl)octadecane	0.57	1-Docosene
Linolenic acid	11.87	-	n-Octacosane	0.86	1-Eicosanol
Labd-14-ene-8,13-diol,(13R)-	0.58	-	n-Nonacosane	1.03	Hentriaccontane
3-Ethyl-5-(2'-ethylbutyl)octadecane	0.57	-	n-Nonaldehyde	-	E,E,Z-1,3,12-Nonadecatriene-5,14-diol
n-Octacosane	0.86	1.75	n-Nonanoic acid	-	0.18
n-Nonacosane	1.03	3.17	Benzosulfonazole	-	Nonadecyl alcohol
n-Nonaldehyde	-	0.18	Acetic acid	-	0.16
n-Nonanoic acid	-	0.16	n-Decanoic acid	-	0.13
Benzosulfonazole	-	0.13	Copaene	-	0.11
Acetic acid	-	0.11	2-Methyl-5-hydroxybenzofuran	-	0.07
n-Decanoic acid	-	0.07	Phen-1,4-diol,3,6,-dimethyl-	-	0.05
Copaene	-	0.05	cis-(-)-2,4 α ,5,6,9 α -Hexahydro-3,5,5,9-tetramethyl(1H)benzocycloheptene	-	0.11
2-Methyl-5-hydroxybenzofuran	-	0.11	Stigmasterol	-	0.11
Phen-1,4-diol,3,6,-dimethyl-	-	0.11	Baccharis oxide	-	0.11
cis-(-)-2,4 α ,5,6,9 α -Hexahydro-3,5,5,9-tetramethyl(1H)benzocycloheptene	-	0.3	τ -Sitosterol	-	0.3
Dihydropseudoionone	-	0.18	Retinoyl- β -glucuronide 6',3'-lactone	-	0.18
			Diploptene	-	0.18
