

# Contemporary Organic Synthesis

*A journal of current developments in Organic Synthesis*

VOLUME 4 NUMBER 6

## CONTENTS

Alcohols, ethers and phenols

435

**By Joseph B. Sweeney**

*Reviewing the literature published between February 1995 and February 1996*

Protecting groups

454

**By Krzysztof Jarowicki and Philip Kocienski**

*Reviewing the literature published in 1996*

Saturated and unsaturated hydrocarbons

493

**By David A. Entwistle**

*Reviewing the literature published between May 1996 and December 1996*

Imines, enamines and oximes

517

**By Joseph P. Adams**

*Reviewing the literature published between January 1995 and January 1997*

## Cumulative Contents of Volume 4

### Number 1

- 1 Asymmetric processes (*January 1994 to March 1995*) **Andrew C. Regan**
- 22 Applications of stoichiometric organotransition metal complexes in organic synthesis (*1 May 1995 to 30 April 1996*) **Timothy J. Donohoe, Paul M. Guyo, Peter R. Moore and Clare A. Stevenson**
- 40 Saturated and unsaturated hydrocarbons (*January 1995 to May 1996*) **David A. Entwistle**
- 61 Synthetic developments in host-guest chemistry (*January to December 1995*) **Justin J. B. Perry and Jeremy D. Kilburn**

### Number 2

- 87 Cycloadditions in synthesis (*January 1995 to June 1996*) **Colin P. Dell**
- 118 Organic halides (*1 July 1995 to 30 June 1996*) **Stephen P. Marsden**
- 136 Main group organometallics in synthesis (*July 1995 to June 1996*) **Iain Coldham**
- 164 Aldehydes and ketones (*October 1995 to September 1996*) **Nicholas J. Lawrence**

### Number 3

- 183 Imines, enamines and related functional groups (*May 1993 to January 1995*) **Joseph P. Adams and Graeme Robertson**
- 196 Free radical-mediated macrocyclisations and transannular cyclisations in synthesis (*up to January 1997*) **Sandeep Handa and Gerald Pattenden**
- 216 Recent developments in solid-phase organic synthesis (*October 1995 to October 1996*) **Richard Brown**
- 238 Saturated oxygen heterocycles (*1 July 1994 to 30 September 1996*) **Mark C. Elliott**

### Number 4

- 261 Synthesis of heterocycles by radical cyclisation (*January 1994 to June 1996*) **Fawaz Aldabbagh and W. Russell Bowman**
- 281 Saturated and unsaturated lactones (*1 November 1995 to 31 October 1996*) **Ian Collins**
- 309 Carboxylic acids and esters (*1 August 1995 to 31 July 1996*) **Tammy Ladduwahetty**
- 326 Amines and amides (*1996*) **Michael North**

### Number 5

- 353 Catalytic applications of transition metals in organic synthesis (*1 November 1995 to 31 October 1996*) **Louise Tonks and Jonathan M. J. Williams**
- 373 Microwave irradiation: more than just a method for accelerating reactions (*up to 1996*) **Fernando Langa, Pilar de la Cruz, Antonio de la Hoz, Angel Díaz-Ortiz and Enrique Díez-Barra**
- 387 Saturated nitrogen heterocycles (*1996*) **Alan Nadin**
- 415 Nitro and related compounds (*May 1995 to October 1996*) **Joseph P. Adams and David S. Box**

### Number 6

- 435 Alcohols, ethers and phenols (*February 1995 to February 1996*) **Joseph B. Sweeney**
- 454 Protecting groups (*1996*) **Krzysztof Jarowicki and Philip Kocienski**
- 493 Saturated and unsaturated hydrocarbons (*May 1996 to December 1996*) **David A. Entwistle**
- 517 Imines, enamines and oximes (*January 1995 to January 1997*) **Joseph P. Adams**

The Library and Information Centre (LIC) of the RSC offers a first class Document Delivery Service for items in Chemistry and related subjects. Contact the LIC, The Royal Society of Chemistry, Burlington House, Piccadilly, London W1V 0BN. Tel: +44 (0)171 437 8656 – Fax: +44 (0)171 287 9798 – Email: [library@rsc.org](mailto:library@rsc.org)

This service is only available from the LIC in London and not the RSC in Cambridge.

# *PERKIN TRANSACTIONS 1*

**North American Associate Editor: Professor Philip D Magnus**

Authors from the US, Canada or Mexico who wish to publish in Perkin 1 should send their manuscripts to:

Professor Philip D Magnus  
Perkin Transactions 1  
Department of Chemistry and Biochemistry  
University of Texas at Austin  
Austin  
TX 78712-1167  
USA

## **Contemporary Organic Synthesis to merge with Perkin 1**

From 1998, the material previously published as *Contemporary Organic Synthesis* will appear as a reviews section in *Perkin Transactions 1*. The journal will be essential reading for communications, full papers **and** reviews detailing the latest international advances in organic synthesis and bioorganic chemistry.

Non-UK citizens who publish in *Perkin Transactions 1* are invited to apply for Royal Society of Chemistry Travel Grants for International Authors. Further details on the RSC world-wide web pages at <http://chemistry.rsc.org/rsc/igrant.htm/>.

# CHEMICAL SOCIETY REVIEWS

## CELEBRATES ITS 1/4 CENTURY ANNIVERSARY IN '97

... and to mark this occasion, the journal has been given a makeover, with an **attractive new colourful design**, inside and out, making the journal a pleasure to read, with articles now even more clearly and logically presented.

In addition, 1997 marks the appointment of a brand **new and enlarged editorial board**, with members representing countries from all over Europe, who will endeavour to increase still further the international content of *Chemical Society Reviews*.

### 1997 Pricing 6 issues per year

	Institutional Rate	Personal Rate
USA	\$234	\$80
UK & Rest of World	£130	£45

\* Offer available only to individuals working for organisations that already have a full non-members subscription at the same site.

### KEY FEATURES

- Articles of wide appeal from the world's leading chemists
- A guide to the latest research developments
- Key reference lists to facilitate further reading
- Attractive presentation
- State-of-the-art coverage
- Aids development of teaching materials

**Chemical Society Reviews** recognises the importance of interdisciplinary dialogue in scientific research and contains reviews covering a diversity of topics. The articles provide a contemporary overview of topical areas of chemistry, enabling their importance and application to adjacent fields to be assessed.

**Chemical Society Reviews** provides essential background knowledge for advanced undergraduates and post-graduates who require a broad-based understanding of modern chemistry, and who wish to identify a career path or research direction. It is also invaluable to chemists with wide subject interests, and scientists in related disciplines who recognise the importance of being aware of the latest advances in chemistry.
