SUBJECT INDEX

- Alkynyl (metal) compounds, coordination chemistry of, 89
- Copper(II) compounds, structural isomerism of, 239
- Cyanogen, cyanogen halides and hydrogen cyanide, the coordination chemistry of, 165
- Cyanogen halides, hydrogen cyanide and cyanogen, the coordination chemistry of, 165
- Ditertiaryphosphine dioxides, solvent extraction properties of, 283
- Electrochemistry of transition metal clusters, 55
- Hydrogen cyanide, cyanogen and cyanogen halides, the coordination chemistry of, 165
- Metal alkynyl compounds, coordination chemistry of, 89
- Multiply bonded ligands, stereochemical aspects of reactions of complexes of d^0 transition metals with, 15
- Organometallic π -complexes of silacycles, 1
- Organostannate(IV) complexes, 263
- Oxidative addition reaction, thermochemistry of the, 205
- Redox potentials of transition metal complexes, trends in, 41
- Silacycles, organometallic π -complexes of, 1
- Solvent extraction properties of ditertiaryphosphine dioxides, 283
- Stereochemical aspects of reactions of complexes of d^0 transition metals with multiply bonded ligands, 15
- Structural isomerism of copper(II) compounds, 239
- Thermochemistry of the oxidative addition reaction, 205
- Thermochromic phase transitions in transition metal salts, 125
- Transition metal clusters, electrochemistry of, 55
- Transition metal complexes, trends in redox potentials of, 41
- Transition metal salts, thermochromic phase transitions in, 125
- d^0 Transition metals with multiply bonded ligands, stereochemical aspects of reactions of complexes of, 15
