### SUBJECT INDEX

---

- Alkynes, isocyanides and cyanides at dinitrogen-binding transition metal centres, reactions of, 13
- Cyanides, at dinitrogen-binding transition metal centres, reactions of alkynes, isocyanides and, 13
- $\alpha$ -Diimine complexes, spectroscopy, photophysics and photochemistry of zerovalent transition metal, 39
- Dinitrogen-binding transition metal centres, reactions of alkynes, isocyanides and cyanides at, 13
- Isocyanides, and cyanides at dinitrogen-binding transition metal centres, reactions of alkynes, 13
- Metal  $\beta$ -ketoenolates and related complexes, infrared spectra of, 173
- Nucleosides-nucleotides, binary complexes of palladium(II) with peptides and ternary complexes of palladium(II) with peptides and, 1
- Palladium(II), with peptides and ternary complexes of palladium(II) with peptides and nucleosides-nucleotides, binary complexes of, 1
- Peptides, and ternary complexes of palladium(II) with peptides and nucleosides-nucleotides, binary complexes of palladium(II) with, 1
- Polyaza macrocycles, bearing pendent coordinating groups, complexes of, 297
- Pyridine, infrared and Raman spectra with particular reference to isotopic labelling studies, metal complexes of, 251
- $\text{Ru}(\text{bpy})_3^{2+}$ , on porous vycor glass, spectral, photophysical and photochemical properties of, 113
- Type I copper proteins, structures of copper coordination compounds with thioether and azole-containing ligands, model systems for, 143
