SUBJECT INDEX

-
- Air/water interface
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Brewster angle microscopy
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Cadmium-thiocyanate polymers
Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157
- Chain
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Controller
Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157
- Coumarin addition
Hydrogen and fluorine in crystal engineering: Systematics from crystallographic studies of hydrogen bonded tartrate–amine complexes and fluoro-substituted coumarins, styrylcoumarins and butadienes 81
- Crystal engineering
Organometallic crystal engineering: prospects for a systematic design 19
Hydrogen bonding in substituted-ammonium salts of the tetracarbonylcobaltate(–I) anion: some insights into potential roles for transition metals in organometallic crystal engineering 43
Hydrogen and fluorine in crystal engineering: Systematics from crystallographic studies of hydrogen bonded tartrate–amine complexes and fluoro-substituted coumarins, styrylcoumarins and butadienes 81
- Interwoven supramolecular arrays via the noncovalent polymerization of pseudotaxanes 139

PII: S0010-8545(99)00049-1

- Crystal growth
Optical materials for short wavelength generation 101
- Cu(II)
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Fluorescence microscopy
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Functionality
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Harmonic generation
Optical materials for short wavelength generation 101
- Host–guest complexes
Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157
- Hydrogen bonding
Hydrogen bonding in substituted-ammonium salts of the tetracarbonylcobaltate(–I) anion: some insights into potential roles for transition metals in organometallic crystal engineering 43
- Iminodiacetate
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Inorganic crystal engineering
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Inorganic supramolecular array
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Intermolecular interactions
Organometallic crystal engineering: prospects for a systematic design 19
- Interwoven systems
Interwoven supramolecular arrays via the noncovalent polymerization of pseudorotaxanes 139
- Ladder
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Metal carbonyl compounds
Hydrogen bonding in substituted-ammonium salts of the tetracarbonylcobaltate(–I) anion: some insights into potential roles for transition metals in organometallic crystal engineering 43
- Metal-chelating lipids
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Molecular and crystal engineering
Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157
- Monolayers
Binding and two-dimensional crystallization of streptavidin at the air/water interface via engineered Cu-IDA chelator lipids 3
- Network
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Noncovalent interactions
Interwoven supramolecular arrays via the noncovalent polymerization of pseudorotaxanes 139
- Organic fluorine
Hydrogen and fluorine in crystal engineering: Systematics from crystallographic studies of hydrogen bonded tartrate–amine complexes and fluoro-substituted coumarins, styrylcoumarins and butadienes 81
- Organometallics
Organometallic crystal engineering: prospects for a systematic design 19
- Pseudorotaxanes
Interwoven supramolecular arrays via the noncovalent polymerization of pseudorotaxanes 139
- Self-assembly
Interwoven supramolecular arrays via the noncovalent polymerization of pseudorotaxanes 139
- Sheet
Inorganic crystal engineering using self-assembly of tailored building-blocks 117
- Spacer
Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157
- Stimulated Raman scattering
Optical materials for short wavelength generation 101

Structure and SHG

Hydrogen and fluorine in crystal engineering: Systematics from crystallographic studies of hydrogen bonded tartrate–amine complexes and fluoro-substituted coumarins, styrylcoumarins and butadienes 81

Supramolecular chemistry

Interwoven supramolecular arrays via the noncovalent polymerization of pseudotaxanes 139

Supramolecular organometallic chemistry

Hydrogen bonding in substituted-ammonium salts of the tetracarbonylcobaltate(–I) anion: some insights into potential roles for transition metals in organometallic crystal engineering 43

Tartrate–amine complexes

Hydrogen and fluorine in crystal engineering:

Systematics from crystallographic studies of hydrogen bonded tartrate–amine complexes and fluoro-substituted coumarins, styrylcoumarins and butadienes 81

Template

Molecular and crystal engineering of a new class of inorganic cadmium-thiocyanate polymers with host–guest complexes as organic spacers, controllers, and templates 157

Upconversion

Optical materials for short wavelength generation 101

Waveguides

Optical materials for short wavelength generation 101
