

Subject Index of Volume 249

π – π

Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545

Absorption

Magnetism of metal-nitroxide compounds involving bis-chelating imidazole and benzimidazole substituted nitronyl nitroxide free radicals 2591

Absorption spectra

Excited state properties of organometallics based on interligand interactions between aromatic ligands 1511

Absorption-fine-structure

X-ray magnetic circular dichroism—a high energy probe of magnetic properties 3

Acetyl coenzyme A synthase

Structure–function relationships of nickel–iron sites in hydrogenase and a comparison with the active sites of other nickel–iron enzymes 1609

Structural and spectroscopic models of the A-cluster of acetyl coenzyme A synthase/carbon monoxide dehydrogenase: Nature's Monsanto acetic acid catalyst 3007

Acetyl-CoA synthase

Chemistry relating to the nickel enzymes CODH and ACS 1582

A-cluster

Structural and spectroscopic models of the A-cluster of acetyl coenzyme A synthase/carbon monoxide dehydrogenase: Nature's Monsanto acetic acid catalyst 3007

Acrylamide

Coordination chemistry of acrylamide 1283

Acrylamide complexes

Coordination chemistry of acrylamide 1283

Actinides

Lanthanides and actinides: annual survey of their organometallic chemistry covering the year 1999 919

Lanthanides and actinides: Annual survey of their organometallic chemistry covering the year 2000 2787

Activation

Metal compounds and small molecules activation – case studies 2437

Activation energies

Photochemical reactions of rhodium(III) diimine complexes in solid glycerol matrices. Ligand-field influences on activation parameters 1310

Acylpyrazolone ligands

Acylpyrazolone ligands: Synthesis, structures, metal coordination chemistry and applications 2909

Aerated solutions

Oxidation of organic substrates in aerated aqueous solutions by the Fenton reagent 1937

Agnostic interaction

The use of synchrotron radiation in X-ray charge density analysis of coordination complexes 179

Alkali metals

Silicon derivatives of group 1, 2, 11 and 12 elements 781

Alkaline earth metals

Silicon derivatives of group 1, 2, 11 and 12 elements 781

Groups 2 and 3 metal complexes incorporating fluorenyl ligands 1221

Alkoxyacylation

Application of transition metals in hydroformylation annual survey covering the year 2004 2946

Alkyd paint

The oxidative drying of alkyd paint catalysed by metal complexes 1709

Alkylation

The key role of heme to trigger the antimalarial activity of trioxanes 1927

Alkynylation

Synthesis and application of new chiral catalysts for asymmetric alkynylation reactions 1736

All-metal aromatic compounds

DFT study of “all-metal” aromatic compounds 2740

Aluminum

Group 13 alkyl compounds incorporating aliphatic and aromatic diolate ligands 2176

Amide/imide complexes

Organic ammonium halides as analogues of main-group amide/imide complexes in the solid state: Extension of ring-laddering and ring-stacking principles 2035

Amino acids

Structure and thermodynamic stability of lanthanide complexes with amino acids and peptides 567

Photophysics and structure of selected lanthanide compounds 2489

Aminoglycoside antibiotics

Chemical and biological aspects of Cu^{2+} interactions with peptides and aminoglycosides 2323

Aminophosphines

The chemistry of phosphinoamides and related compounds 2056

Amine-polypyridine ruthenium(II) complexes

Electron-transfer spectroscopy: donor–acceptor electronic coupling, reorganizational energies, reaction pathways and dynamics 343

Ammonium halides

Organic ammonium halides as analogues of main-group amide/imide complexes in the solid state: Extension of ring-laddering and ring-stacking principles 2035

Angeli's salt

The chemistry of nitroxyl (HNO) and implications in biology 433

Annealing

Atomic resolution crystallography and XAFS 197

Antiferromagnets

New trends of molecular magnetism 2534

Aqua

Aqua palladium complexes: synthesis, properties and applications 1135

Aromatic criteria

DFT study of “all-metal” aromatic compounds 2740

Aromatic metal clusters

DFT study of “all-metal” aromatic compounds 2740

Aromaticity

The anions and dianions of group 14 metalloles 765

DFT study of “all-metal” aromatic compounds 2740

Artemisinin

The key role of heme to trigger the antimalarial activity of trioxanes 1927

- Artificial photosynthesis
 Exited state electron and energy transfer in molecular assemblies 457
- Aryloxides
 Aryloxo and thiolato vanadium complexes as chemical models of the active site of vanadium nitrogenase 2144
- Asymmetric catalysis
 Synthesis and application of new chiral catalysts for asymmetric alkynylation reactions 1736
- Atom transfer radical polymerization
 Structural aspects of copper catalyzed atom transfer radical polymerization 1155
- Atomic resolution
 Atomic resolution crystallography and XAFS 197
- Atoms
 Complementarity of QTAIM and MO theory in the study of bonding in donor–acceptor complexes 633
- Aurophilic bonding
 Photophysics of supramolecular binary stacks consisting of electron-rich trinuclear Au(I) complexes and organic electrophiles 1372
- Aurophilicity
 A comparative study on metal–metal interaction in binuclear two- and three-coordinated d¹⁰-metal complexes. Spectroscopic investigation of M(I)–M(I) interaction in the ¹[dΣ*pΣ] excited state of [M₂(dcpm)₂]²⁺ (dcpm = bis(dicyclohexylphosphino)methane) (M = Au, Ag, Cu) and [M₂(dmpm)₃]²⁺ (dmpm = bis(dimethylphosphino)methane) (M = Au, Ag, Cu) complexes 1476
- Azobenzene
 Combination of redox- and photochemistry of azo-conjugated metal complexes 1468
- Bimetallic chains
 Design of single chain magnets through cyanide-bearing six-coordinate complexes 2691
- Binuclear complexes
 The chemistry of binuclear palladium(II) and platinum(II) complexes 3075
- Binuclear ruthenium(II,III)
 Convergence of spectroscopic and kinetic electron transfer parameters for mixed-valence binuclear dipyridylamide ruthenium ammine complexes 507
- Bioassays
 Biological labelling reagents and probes derived from luminescent transition metal polypyridine complexes 1434
- Bioinorganic chemistry
 Some general principles for designing electrocatalysts with hydrogenase activity 1518
 DFT investigations of models related to the active site of [NiFe] and [Fe] hydrogenases 1620
 Iron hydrogenase active site mimics in supramolecular systems aiming for light-driven hydrogen production 1653
- Biological implications
 Chemical and biological aspects of Cu²⁺ interactions with peptides and aminoglycosides 2323
- Biomimetic
 Structural and functional models related to the nickel hydrogenases 1555
- Biomimetic catalysts
 Catalysis of the electrochemical H₂ evolution by di-iron sub-site models 1664
- Biomimetic modelization
 Some general principles for designing electrocatalysts with hydrogenase activity 1518
- Bioorganometallic chemistry
 Catalysis of the electrochemical H₂ evolution by di-iron sub-site models 1664
- Bioregulation
 Metal compounds and small molecules activation – case studies 2437
- 2,2'-Bipyridine
 Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545
- Bipyridine complex
 Combination of redox- and photochemistry of azo-conjugated metal complexes 1468
- Bispyridylamide
 Bispyridylamides—coordination chemistry and applications in catalytic reactions 727
- Blue copper
 Ligand K-edge X-ray absorption spectroscopy: covalency of ligand–metal bonds 97
- Bonding
 Complementarity of QTAIM and MO theory in the study of bonding in donor–acceptor complexes 633
- Branching ratio
 X-ray magnetic circular dichroism—a high energy probe of magnetic properties 3
- C₆₀
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₇₀
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₇₂
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₇₄
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₇₈
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₈₀
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₈₂
 Electronic structures and spectral properties of endohedral fullerenes 1111
- C₈₄
 Electronic structures and spectral properties of endohedral fullerenes 1111
- Cages
 Group 13 imido metallanes and their heavier analogs [RMYR']_n (M = Al, Ga, In; Y = N, P, As, Sb) 2094
- Cancer
 Targeting platinum anti-tumour drugs: Overview of strategies employed to reduce systemic toxicity 2845
- Carbazoles
 Metallated molecular materials of fluorene derivatives and their analogues 971
- Carbene analogue
 The coordination chemistry and reactivity of group 13 metal(I) heterocycles 1857
- Carbene complexes
 2,3-Dihydroimidazol-2-ylidenes and their main group element chemistry 829
- Carbenes
 2,3-Dihydroimidazol-2-ylidenes and their main group element chemistry 829
 Iridium carboxycarbene complexes by C–H bond activation of aliphatic ethers and of alkyl aryl ethers 1729
- Carbon monoxide dehydrogenase
 Chemistry relating to the nickel enzymes CODH and ACS 1582
 Structure–function relationships of nickel–iron sites in hydrogenase and a comparison with the active sites of other nickel–iron enzymes 1609
- Carbon–fluorine bond
 Carbon–fluorine bond activation by platinum group metal complexes 1957
- Carbon-transition metal
 The chemistry of the carbon-transition metal double and triple bond: annual survey covering the year 2003 999
- Carbonylation reaction
 Structural and mechanistic studies of Pd-catalyzed C–C bond formation: The case of carbonylation and Heck reaction 2308
- Carboxylate
 Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545

Carcinogenesis

Mechanistic studies of relevance to the biological activities of chromium 281

Catalysis

Bispyridylamides—coordination chemistry and applications in catalytic reactions 727

Metal–salen complexes as efficient catalysts for the oxygenation of heteroatom containing organic compounds—synthetic and mechanistic aspects 1249

Some general principles for designing electrocatalysts with hydrogenase activity 1518

Phosphorus dendrimers possessing metallic groups in their internal structure (core or branches): Syntheses and properties 1917

Metal ion catalysis in acyl and phosphoryl transfer: Transition states as ligands 1997

Catalysis by transition metal complexes of alkene silylation – recent progress and mechanistic implications 2374

P-Modular bis(phosphines) based on the 1,2-*trans*-disubstituted cyclopentane framework in synthesis, coordination chemistry, and catalysis 2962

Catalyst

Related rhenium(V) catalysts adopt different mechanisms for oxygen atom transfer 329

Peroxyoxynitritometal complexes 499

Cationic porphyrin

Understanding binding interactions of cationic porphyrins with B-form DNA 1451

C–C coupling

Structural and mechanistic studies of Pd-catalyzed C–C bond formation: The case of carbonylation and Heck reaction 2308

C–H activation

Iridium carboxycarbene complexes by C–H bond activation of aliphatic ethers and of alkyl aryl ethers 1729

Chains as magnets

Design of single chain magnets through cyanide-bearing six-coordinate complexes 2691

Charge density

The use of synchrotron radiation in X-ray charge density analysis of coordination complexes 179

Charge transfer

Multiplet effects in X-ray spectroscopy 31

Temperature- and photo-induced phase transition in rubidium manganese hexacyanoferrate 1830

Chelate phosphines

P-Modular bis(phosphines) based on the 1,2-*trans*-disubstituted cyclopentane framework in synthesis, coordination chemistry, and catalysis 2962

Chelating ligands

Coordination properties of didentate N,O heterocyclic alcohols and aldehydes towards Cu(II), Co(II), Zn(II) and Cd(II) ions in the solid state and aqueous solution 2259

Chemical biology

The chemistry of nitroxyl (HNO) and implications in biology 433

Chemical bonding

High resolution 1s core hole X-ray spectroscopy in 3d transition metal complexes—electronic and structural information 65

Chemistry

The chemistry of the carbon-transition metal double and triple bond: annual survey covering the year 2003 999

Chemotherapy

Targeting platinum anti-tumour drugs: Overview of strategies employed to reduce systemic toxicity 2845

Chirality

Solution structure of chiral lanthanide complexes 2854

P-Modular bis(phosphines) based on the 1,2-*trans*-disubstituted cyclopentane framework in synthesis, coordination chemistry, and catalysis 2962

Chromium

Mechanistic studies of relevance to the biological activities of chromium 281

Chromium cages

Studies of chromium cages and wheels 2577

Chromium/manganese nitrito complexes

Photochemical reactions leading to NO and NO_x generation 1382

Chromium(VI)

Coordination geometry of Cr(VI) species: Structural and spectroscopic characteristics 2391

Circular dichroism

X-ray magnetic circular dichroism—a high energy probe of magnetic properties 3

Solution structure of chiral lanthanide complexes 2854

Cisplatin

Targeting platinum anti-tumour drugs: Overview of strategies employed to reduce systemic toxicity 2845

cis–*trans* isomerism

A quantum chemical computational study of the relative stabilities of *cis*- and *trans*-platinum dichloride in aqueous solution 299

Closed shell

Structural and spectroscopic evidence for weak metal–metal interactions and metal–substrate exciplex formations in d¹⁰ metal complexes 1296

Clusters

Polynuclear manganese grids and clusters—A magnetic perspective 2677

CO binding

Structural and spectroscopic models of the A-cluster of acetyl coenzyme A synthase/carbon monoxide dehydrogenase: Nature's Monsanto acetic acid catalyst 3007

Cobalt

The oxidative drying of alkyd paint catalysed by metal complexes 1709

Cobalt(III)

Celebration of inorganic lives: Interview with Alan M. Sargeson 2731

Complex

Aqua palladium complexes: synthesis, properties and applications 1135

Magnetism of metal-nitroxide compounds involving bis-chelating imidazole and benzimidazole substituted nitronyl nitroxide free radicals 2591

Complexation capabilities

Supramolecular chemistry and complexation abilities of diphosphonic acids 2458

Complexation thermodynamics

Structure and thermodynamic stability of lanthanide complexes with amino acids and peptides 567

Conducting materials

Recent advances in polyoxometalate-containing molecular conductors 1776

Conjugated molecules

Metallated molecular materials of fluorene derivatives and their analogues 971

Conjugated polymers

Synthesis and photosensitizing properties of conjugated polymers that contain chlorotricarbonyl bis(phenylimino)acenaphthene rhenium(I) complexes 1351

 π -Conjugated polymers

The triplet state in Pt-acetylide oligomers, polymers and copolymers 1491

Continuous shape measures

Shape maps and polyhedral interconversion paths in transition metal chemistry 1693

Cooperativity

Strict self-assembly of polymetallic helicates: the concepts behind the semantics 705

Coordination

The use of synchrotron radiation in X-ray charge density analysis of coordination complexes 179

Bispyridylamides—coordination chemistry and applications in catalytic reactions 727

Coordination chemistry of polyamines and their interactions in ternary systems including metal ions, nucleosides and nucleotides 2335

Coordination bond

Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545

Coordination chemistry

Metal derivatives of poly(pyrazolyl)alkanes. II. Bis(pyrazolyl)alkanes and related systems 663

Native and mutant nickel–iron hydrogenases: Unravelling structure and function 1596
- Fuel cell
Chemical and electrochemical depositions of platinum group metals and their applications 613
- Fullerenes
Photoinduced electron transfer in supramolecular systems of fullerenes functionalized with ligands capable of binding to zinc porphyrins and zinc phthalocyanines 1410
- Gadolinium(III)
Magnetism of metal-nitroxide compounds involving bis-chelating imidazole and benzimidazole substituted nitronyl nitroxide free radicals 2591
- Gallium
Group 13 alkyl compounds incorporating aliphatic and aromatic diolate ligands 2176
- Gas metabolism
Structure–function relationships of nickel–iron sites in hydrogenase and a comparison with the active sites of other nickel–iron enzymes 1609
- Global kinetic analysis
Mechanistic studies of relevance to the biological activities of chromium 281
- Gold
Luminescence in complexes with Au(I)–Ti(I) interactions 1423
- Gold nanorods
Gold nanorods: Synthesis, characterization and applications 1870
- Gold(I)
Copper(I), silver(I) and gold(I) carboxylate complexes as precursors in chemical vapour deposition of thin metallic films 2232
- Grids
Polynuclear manganese grids and clusters—A magnetic perspective 2677
- Ground-state
X-ray magnetic circular dichroism—a high energy probe of magnetic properties 3
- Group 13
The coordination chemistry and reactivity of group 13 metal(I) heterocycles 1857
- Group 13 elements
Hydrogen-bond supramolecular structure of group 13 Schiff base complexes 1185
- Group 13–15 compounds
Group 13 imido metallanes and their heavier analogs [RMYR']_n (M = Al, Ga, In; Y = N, P, As, Sb) 2094
- H/D exchange reaction
H/D exchange reactions and mechanistic aspects of the hydrogenases 1677
- H₂ biocatalysis
Native and mutant nickel–iron hydrogenases: Unravelling structure and function 1596

- Haemoprotein
 Peroxynitritometal complexes 499
- Heavy metal uptake
 Phytoremediation of heavy metals and study of the metal coordination by X-ray absorption spectroscopy 1797
- Heavy-atom effect
 Photophysics of supramolecular binary stacks consisting of electron-rich trinuclear Au(I) complexes and organic electrophiles 1372
- Heck reaction
 Structural and mechanistic studies of Pd-catalyzed C–C bond formation: The case of carbonylation and Heck reaction 2308
- Helical structures
 Hydrogen-bond supramolecular structure of group 13 Schiff base complexes 1185
- Helicate
 Strict self-assembly of polymetallic helicates: the concepts behind the semantics 705
- Heme
 The key role of heme to trigger the antimalarial activity of trioxanes 1927
- Heme proteins
 Three-dimensional structure determination using multiple-scattering analysis of XAFS: applications to metalloproteins and coordination chemistry 141
- Hemoglobin
 Heme-iron in lipid oxidation 485
- Heteroatom
 Metal–salen complexes as efficient catalysts for the oxygenation of heteroatom containing organic compounds—synthetic and mechanistic aspects 1249
- Heterocycle
 Related rhenium(V) catalysts adopt different mechanisms for oxygen atom transfer 329
 2,3-Dihydroimidazol-2-ylidenes and their main group element chemistry 829
 The coordination chemistry and reactivity of group 13 metal(I) heterocycles 1857
- Heterocyclic alcohols
 Coordination properties of didentate N,O heterocyclic alcohols and aldehydes towards Cu(II), Co(II), Zn(II) and Cd(II) ions in the solid state and aqueous solution 2259
- Heterocyclic aldehydes
 Coordination properties of didentate N,O heterocyclic alcohols and aldehydes towards Cu(II), Co(II), Zn(II) and Cd(II) ions in the solid state and aqueous solution 2259
- Heteropolyacids
 Polyoxometalates as the catalysts for tertiary ethers MTBE and ETBE synthesis 2222
- Heteroporphyrins
 Core modified porphyrins – a macrocyclic platform for organometallic chemistry 2510
- High-frequency vibronic modes
 Electron-transfer spectroscopy: donor–acceptor electronic coupling, reorganizational energies, reaction pathways and dynamics 343
- Histidine peptides
 Chemical and biological aspects of Cu²⁺ interactions with peptides and aminoglycosides 2323
- History
 Celebration of inorganic lives: Interview with Alan M. Sargeson 2731
- Homogeneous catalysis
 Groups 2 and 3 metal complexes incorporating fluorenyl ligands 1221
- Homogeneous catalyst
 Structure and reactivity of tungsten(II) and molybdenum(II) compounds containing an M–M' bond 2195
- Host–guest interactions
 Multifunctionality in spin crossover materials 2661
- Hush theory
 Convergence of spectroscopic and kinetic electron transfer parameters for mixed-valence binuclear dipyritylamide ruthenium ammine complexes 507
- Hybrid catalyst
 Ruthenium complexes bearing bidentate Schiff base ligands as efficient catalysts for organic and polymer syntheses 3055
- Hydride complex
 Reactions of hydroxymethyl and hydride complexes in water: synthesis, structure and reactivity of a hydroxymethyl–cobalt complex 375
- Hydrides
 Iron-only hydrogenase: Synthetic, structural and reactivity studies of model compounds 1641
- Hydroaminomethylation
 Application of transition metals in hydroformylation annual survey covering the year 2004 2946
- Hydroformylation
 Application of transition metals in hydroformylation annual survey covering the year 2004 2946
- Hydrogen
 Oxygen and hydrogen photocatalysis by two-electron mixed-valence coordination compounds 1316
- Hydrogen activation
 DFT investigations of models related to the active site of [NiFe] and [Fe] hydrogenases 1620
- Hydrogen bond
 Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545
 Hydrogen-bond supramolecular structure of group 13 Schiff base complexes 1185
- Hydrogen bonding
 Aqua palladium complexes: synthesis, properties and applications 1135
- Hydrogen economy
 Iron-only hydrogenase: Synthetic, structural and reactivity studies of model compounds 1641
- Hydrogen oxidation
 Some general principles for designing electrocatalysts with hydrogenase activity 1518
- Hydrogen peroxide
 Epoxidation of olefins with hydrogen peroxide catalyzed by polyoxometalates 1944
- Hydrogenase
 Some general principles for designing electrocatalysts with hydrogenase activity 1518
 Spectroelectrochemistry of hydrogenase enzymes and related compounds 1536
 Structure–function relationships of nickel–iron sites in hydrogenase and a comparison with the active sites of other nickel–iron enzymes 1609
 Catalysis of the electrochemical H₂ evolution by di-iron sub-site models 1664
- Hydrolysis
 Metal ion catalysis in acyl and phosphoryl transfer: Transition states as ligands 1997
- Hydrolytic cleavage
 Organooxotin assemblies from Sn–C bond cleavage reactions 1745
- Hydrophobic heteroleptic ruthenium complexes
 Synthesis of novel ruthenium sensitizers and their application in dye-sensitized solar cells 1460
- Hydrosilanes
 Catalysis by transition metal complexes of alkene silylation – recent progress and mechanistic implications 2374
- Hydro(solvo)thermal
 Hydro(solvo)thermal in situ ligand syntheses 1201
- Hydrotris(pyrazolyl)borate
 Iridium carboxycarbene complexes by C–H bond activation of aliphatic ethers and of alkyl aryl ethers 1729
- Hydroxycarbonylation
 Application of transition metals in hydroformylation annual survey covering the year 2004 2946
- Hydroxymethyl complex
 Reactions of hydroxymethyl and hydride complexes in water: synthesis, structure and reactivity of a hydroxymethyl–cobalt complex 375

Hyperaccumulator

Phytoremediation of heavy metals and study of the metal coordination by X-ray absorption spectroscopy 1797

Hypervalent compounds

The importance of the transannular secondary bonding strength in the molecular structures of metallocanes of type $[X(CH_2CH_2Y)_2MRR']$ and $[X(CH_2CH_2Y)_2M'R]$ ($M = Ge(IV), Sn(IV), Pb(IV), M' = As(III), Sb(III)$ and $Bi(III)$; $X = NR'', O, S$; $Y = O, S$) 859

Hysteresis

Pressure effect studies on spin crossover systems 1811

Iminodiphosphines

The chemistry of phosphinoamides and related compounds 2056

In situ ligand synthesis

Hydro(solvo)thermal in situ ligand syntheses 1201

Indium

Group 13 alkyl compounds incorporating aliphatic and aromatic diolate ligands 2176

Infrared spectroscopy

Spectroelectrochemistry of hydrogenase enzymes and related compounds 1536

Inorganic nanocrystals

Recent advances in the shape control of inorganic nano-building blocks 1766

Interaction

Metal-organic molecular architectures with 2,2'-bipyridyl-like and carboxylate ligands 545

Coordination chemistry of polyamines and their interactions in ternary systems including metal ions, nucleosides and nucleotides 2335

Intercalation

Understanding binding interactions of cationic porphyrins with B-form DNA 1451

Interligand states

Excited state properties of organometallics based on interligand interactions between aromatic ligands 1511

Intermediates

Coordination geometry of Cr(VI) species: Structural and spectroscopic characteristics 2391

Ion complexes

Coordination and ligand exchange dynamics of solvated metal ions 2993

Ionic complexes

The chemistry of binuclear palladium(II) and platinum(II) complexes 3075

Ionization energies

Photoionization cross-sections: a guide to electronic structure 209

IR spectra

Electronic structures and spectral properties of endohedral fullerenes 1111

Iridium

Iridium carboxycarbene complexes by C–H bond activation of aliphatic ethers and of alkyl aryl ethers 1729

Carbon–fluorine bond activation by platinum group metal complexes 1957

Iridium(III)

Biological labelling reagents and probes derived from luminescent transition metal polypyridine complexes 1434

Iron

Reaction mechanisms relevant to the formation of iron and ruthenium nitric oxide complexes 391

Structural and functional models related to the nickel hydrogenases 1555

Native and mutant nickel–iron hydrogenases: Unravelling structure and function 1596

DFT investigations of models related to the active site of $[NiFe]$ and $[Fe]$ hydrogenases 1620

Iron catalysis

Heme-iron in lipid oxidation 485

Iron complexes

Interplay between iron complexes, nitric oxide and sulfur ligands: Structure, (photo)reactivity and biological importance 2408

Iron hydrogenase

Iron hydrogenase active site mimics in supramolecular systems aiming for light-driven hydrogen production 1653

Iron sulfur nitrosyls

Photochemical reactions leading to NO and NO_x generation 1382

Iron-only hydrogenase

Iron-only hydrogenase: Synthetic, structural and reactivity studies of model compounds 1641

Iron–sulfur cluster

Ligand K-edge X-ray absorption spectroscopy: covalency of ligand–metal bonds 97

Iron-only hydrogenase: Synthetic, structural and reactivity studies of model compounds 1641

Proton transfer to synthetic Fe–S-based clusters 1841

Isomerization

Peroxyinitritometal complexes 499

Jahn–Teller effect

Temperature- and photo-induced phase transition in rubidium manganese hexacyanoferrate 1830

Kharash addition

Ruthenium complexes bearing bidentate Schiff base ligands as efficient catalysts for organic and polymer syntheses 3055

Kinetics

Mechanistic studies of relevance to the biological activities of chromium 281

Reaction mechanisms relevant to the formation of iron and ruthenium nitric oxide complexes 391

Labelling reagents

Biological labelling reagents and probes derived from luminescent transition metal polypyridine complexes 1434

Lanthanide chelates

Photophysics and structure of selected lanthanide compounds 2489

Lanthanide complexes

The synthesis and coordination chemistry of 2,6-bis(pyrazolyl)pyridines and related ligands — Versatile terpyridine analogues 2880

Lanthanides

Structure and thermodynamic stability of lanthanide complexes with amino acids and peptides 567

Lanthanides and actinides: annual survey of their organometallic chemistry covering the year 1999 919

Groups 2 and 3 metal complexes incorporating fluorenyl ligands 1221

Metal complexes of polyaza and polyoxaaza Schiff base macrocycles 2156

Lanthanides and actinides: Annual survey of their organometallic chemistry covering the year 2000 2787

Solution structure of chiral lanthanide complexes 2854

Lanthanum(III)

Magnetism of metal-nitroxide compounds involving bis-chelating imidazole and benzimidazole substituted nitronyl nitroxide free radicals 2591

Large spin systems

Polynuclear manganese grids and clusters—A magnetic perspective 2677

Laser-induced heating

Gold nanorods: Synthesis, characterization and applications 1870

Late TM (ruthenium, rhodium, iron, cobalt, nickel and palladium) complexes

Catalysis by transition metal complexes of alkene silylation – recent progress and mechanistic implications 2374

Layer-block dendrimers

Phosphorus dendrimers possessing metallic groups in their internal structure (core or branches): Syntheses and properties 1917

Lifetimes

Photochemical reactions of rhodium(III) diimine complexes in solid glycerol matrices. Ligand-field influences on activation parameters 1310

Ligand

Related rhenium(V) catalysts adopt different mechanisms for oxygen atom transfer 329

Ligand isomerization

Multifunctionality in spin crossover materials 2661

Ligand K-edge XAS

Ligand K-edge X-ray absorption spectroscopy: covalency of ligand–metal bonds 97
