

DRUG METABOLISM AND DRUG INTERACTIONS

VOLUME 21, NO. 3-4, 2006

CONTENTS

The Influence of P-Glycoprotein on Cerebral and Hepatic Concentrations of Nortriptyline and its Metabolites <i>T.B. Ejlsing, J. Hasselstrøm and K. Linnet, Denmark</i>	139
Drug-Drug Interactions of Anti-Infective Drugs: Utility of Fluorescence CYP Inhibition Assays in Drug Discovery <i>M. Fridén, K. Vanaja and V.N. Nandi, India</i>	163
In Vitro Studies on Quetiapine Metabolism Using the Substrate Depletion Approach with Focus on Drug-Drug Interactions <i>J. Hasselstrøm and K. Linnet, Denmark</i>	187
Quantitative Structure-Activity Relationships (QSARs) Within Cytochromes P450 2B (CYP2B) Subfamily Enzymes: The Importance of Lipophilicity for Binding and Metabolism <i>D.F.V. Lewis, B.G. Lake, Y. Ito and P. Anzenbacher, UK, Japan and Czech Republic</i>	213
Variations in Content of Active Ingredients Causing Drug Interactions in Grapefruit Juice Products Sold in California <i>S. Wanwimolruk and P.V. Marquez, USA</i>	233
Comparative Proteomics Analysis of Differentially Expressed Phosphoproteins in Adult Rat Ventricular Myocytes Subjected to Diazoxide Preconditioning <i>H. Li, Y.-b. Xiao, Y.-Q. Gao and T.-d. Yang, China</i>	245
Index	259
