

## ACKNOWLEDGEMENT TO REFEREES

© Springer International Publishing Switzerland 2013

Dear Reader

As we reach the final issue of *Drug Safety* for 2013, we hope that you have found the articles published throughout the year to be interesting and informative. The editor and publishing staff have appreciated the high quality of content contributed to the journal this year. The publishing schedule for 2014 is well under way, and we are looking forward to bringing you many high-quality and authoritative articles over the coming year.

The quality of articles published in *Drug Safety* was acknowledged in the new Impact Factor of 3.408 for 2012. The journal is now placed 62<sup>nd</sup> in the Pharmacology & Pharmacy category, 20<sup>th</sup> in the Public, Environmental & Occupational Health category and 20<sup>th</sup> in the Toxicology category. The Adis portfolio as a whole saw impressive Impact Factor gains, with flagship journals continuing to increase their citations—*Drugs* raised its Impact Factor to 4.633, with *Clinical Pharmacokinetics* and *Sports Medicine* also seeing significant rises to 6.109 and 5.237, respectively. *Pharmacoeconomics* remains the number one journal in its field, and *The Patient: Patient-Centered Outcomes Research* saw an increase of more than 170 % in its Impact Factor to 1.565, only 1 year after first appearing in the Journal Citation Reports<sup>®</sup>.

2013 saw the successful integration of the Adis portfolio of journals into the Springer production systems and custom-built platforms (SpringerLink, Springer for R&D, and Springer for Hospitals & Health). We are confident that our authors and subscribers benefit from improved discoverability, mobile optimisation and robust delivery of content on these platforms; and Springer production capacity has allowed us to increase the number of articles published whilst considerably reducing submission-to-publication times.

Looking ahead to 2014, the Adis portfolio will continue to grow the amount of content published while maintaining high standards. The number of Adis titles will also increase as existing quality Springer journals are brought under the Adis brand—*Advances in Therapy*, *Targeted Oncology*, and the *European Journal of Drug Metabolism and Pharmacokinetics*. Adis are also committed to fostering Open Access publication: all Adis titles offer the Springer Open Choice option and we are adding a further 10 fully Open Access titles in specific therapy areas such as *Diabetes Therapy*, *Cardiology and Therapy* and *Dermatology and Therapy*, previously published under the Springer Healthcare imprint. Information about the portfolio can be found on [Springer.com/Adis](http://Springer.com/Adis).

We would like to thank all the authors who have contributed articles to *Drug Safety* in the last 12 months. They have generously set aside time in their busy schedules to prepare content, and without their hard work and diligence we would not have been able to publish the journal. The quality of published articles also reflects the significant time and effort dedicated by the peer reviewers, who ensure that we continue to publish content of the highest possible standard. In addition to the members of our Honorary Editorial Board, we would like to thank the following individuals who acted as referees for articles in *Drug Safety* in 2013:

Lise Aagaard, Denmark  
Kalle Aaltonen, Finland  
Ivo Abraham, USA

Along with our schedule of invited articles, we also encourage the submission of high-quality reviews and original research articles. We would like to remind to you keep *Drug Safety* in mind when deciding where to submit your research. We also welcome comment from our readers on any of our articles.

We look forward to your continued support of the journal in 2014 and to bringing you first-class content from around the globe. With best wishes from the staff of *Drug Safety* and all at Adis Publications.
