

Withdrawal

Dear Dr. Conn,

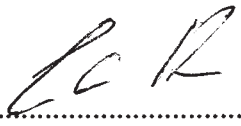

We write this letter with regard to our article:

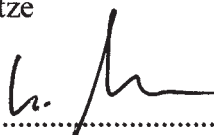

Carsten Boltze, Hendrik Lehnert, Regine Schneider-Stock, Brigitte Peters, Cuong Hoang-Vu, Albert Roessner: HSP 90 is a key for telomerase activation and malignant transition in pheochromocytoma. *Endocrine* 22, 193-202, December 2003

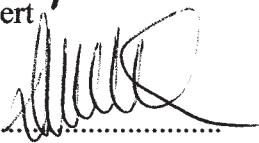

The manuscript was submitted to ENDOCRINE by the first author (C.B.) without prior notification of the other co-authors.

The manuscript is nearly identical to another article from our group that appeared in the September issue of the *Journal of Clinical Endocrinology and Metabolism* (Boltze et al.: Expression profile of the telomeric complex discriminates between benign and malignant pheochromocytoma. *JCEM* 88, 4280-4286, 2003).

We deeply regret that we must advise you of our wish to withdraw this manuscript because of the duplicate nature of this publication.
