ABSTRACTS

S51	Plenary Lectures
S53	EBSA Prize Lecture
S54	Single molecule mechanics
S63	RNA structure & function
S65	Lipid biophysics
S93	Membrane protein folding
S103	Multiscale simulations
S111	Glycobiophysics
S114	Macromolecular assemblies
S129	Proton coupled electron transfer in photosynthesis
S132	DNA/lipid complexes and drug delivery
S136	Live cell imaging
S147	Ion channels: Structure and function
S153	Protein-ligand interactions
S170	Single molecule imaging and spectroscopy
S183	Membrane microdomains & signalling
S193	Organelle motility
S198	Interaction and recognition of DNA
S205	Bionanomaterials & design
S212	Fluorescent proteins: applications
S216	Chemotaxis and signal transduction
S219	Single molecule fluorescence
S223	Electron transfer
S228	Ion channels & cancer
S231	Disordered and aggregated proteins
S243	Photodynamic therapy
S246	Motor proteins in RNA/DNA metabolism
