Human Cancer

D. P. Huang, J. H. C. Ho, Y. F. Poon, E. C. Chew, D. Shaw, M. Lui, C. L. Li, L. S. Mak and S. H. Lai: Establishment of a cell line (NPC/HK1) from a differentiated squamous carcinoma of the nasopharynx.

A. P. Lanier, W. Henle, T. R. Bender, G. Henle and M. L. Talbot: Epstein-Barr virus-specific antibody titers in seven Alaskan natives before and after diagnosis of nasopharyngeal carcinoma.

L. A. Gallinger, H. F. Pross and M. G. Baines: Human lymphocyte/human erythrocyte rosettes. I. Blood 'H' rosettes are high affinity E rosette-forming T lymphocytes occurring in high frequency.

B. Lange, W. Henle, J. D. Meyers, L. C. Yang, C. August, P. Koch, A. Arbeter and G. Henle: Epstein-Barr virus related serology in marrow transplant recipients.

M. Prade, H. Sancho-Garnier, J. P. Cesarini and A. Cochran: Difficulties encountered in the application of Clark classification and the Breslow thickness measurement in cutaneous malignant melanoma.

G. Brubaker, A. G. Levin, C. M. Steel, G. Creasey, H. M. Cameron, C. A. Linsell and P. G. Smith: Multiple cases of Burkitt's lymphoma and other neoplasms in families in the North Mara district of Tanzania.

S. Tsuchiya, M. Yamabe, Y. Yamaguchi, Y. Kobayashi, T. Konno and K. Tada: Establishment and characterization of a human acute monocytic leukemia cell line (THP-1).

K. Kontula, L. C. Andersson, T. Paavonen, G. Myllylä, L. Teerenhovi and P. Vuopio: Glucocorticoid receptors and glucocorticoid sensitivity of human leukemic cells.

M. U. Schneider, M. Troye, S. Paulie and P. Perlmann: Membrane associated antigens on tumor cells from transitional cell carcinoma of the human urinary bladder. I. Immunological characterization by xenogeneic antisera.

M. U. Schneider, S. Paulie, M. Troye and P. Perlmann: Plasma membrane associated antigens on tumor cells derived from transitional cell carcinoma of the human urinary bladder. II. Identification at the molecular level of plasma membrane associated antigens.

N. S. Rote, R. K. Gupta and D. L. Morton: Determination of incidence and partial characterization of tumor-associated antigens found in the urine of patients bearing solid tumors.

Experimental Cancer

K. Kozłowska, B. Zurawska-Czupa, P. Mierzewski and A. Kostulak: Use of the macrophage migration inhibition test to evaluate antigenic differences in golden hamster transplantable melanomas.

O. Alaba and L. W. Law: Induction and specificity of syngeneic antiserum against Rauscher murine leukemia virus-induced leukemia, RBL-5.

R. Evans: Macrophage accumulation in primary and transplanted tumors growing in C5-deficient B10.D2/oSn mice.

J. R. North, A. J. Morgan and M. A. Epstein: Observations on the EB virus envelope and virus-determined membrane antigen (MA) polypeptides.

B. Boeryd and B. Hallgren: The influence of the lipid composition of the feed given to mice on the immunocompetence and tumour resistance of the progeny.

G. A. Turner and L. Weiss: Some effects of products from necrotic regions of tumours in the *in vitro* migration of cancer and peritoneal exudate cells.
