Human Cancer

D. N. Carney, P. A. Bunn, G. P. Schechter and A. F. Gazdar: Lymphocyte transformation in patients with cutaneous T-cell lymphomas.

A. Karande, P. J. Fialkow, K. Nilsson, S. Povey, G. Klein, V. Najfeld and G. Penfold: Establishment of a lymphoid cell line from leukemic cells of a patient with chronic lymphocytic leukemia.

V. Najfeld, P. J. Fialkow, A. Karande, K. Nilsson, G. Klein and G. Penfold: Chromosome analyses of lymphoid cell lines derived from patients with chronic lymphocytic leukemia.

W. Weber, H. Müller, C. Moroni, V. von Flidner, J. A. Sartorius, B. Speck, J. P. Obrecht and M. Jeannet: Two siblings with acute T-cell lymphocytic leukemia.

J. S. Rhim, R. J. Huebner, P. Arnstein and L. Kopelovich: Chemical transformation of cultured human skin fibroblasts derived from individuals with hereditary adenomatosis of the colon and rectum.

P. Seppänen, L. Alhonen-Hongisto, M. Siimes and J. Jänne: Quantitation of methylglyoxal bis(guanyldrazone) in blood plasma and leukemia cells of patients receiving the drug.

G. C. Easty, D. M. Easty, P. Monaghan, M. G. Ormerod and A. M. Neville: Preparation and identification of human breast epithelial cells in culture.

T. L. Gerrard, J. J. Terz and A. M. Kaplan: Cytotoxicity to tumor cells by monocytes from normal individuals and cancer patients.

J. D. Rowley (Ed.): General Report on the Second International Workshop on Chromosomes in Leukemia.

Experimental Cancer

A. Falk and L. Sachs: Clonal regulation of the induction of macrophage and granulocyte inducing proteins for normal and leukemic myeloid cells.

P. J. Fialkow, A. L. Reddy and J. I. Bryant: Clonal origin and trisomy of chromosome 15 in murine B-cell malignancies.

K. Moore and W. H. McBride: The activation state of macrophage sub-populations from tumour tissue.

C. H. O'Neill, G. M. Hodges, P. N. Riddle, P. W. Jordan, R. H. Newman, R. J. Flood and E. C. Toulson: A fine fibrous silica flour contaminant in North-East Iran, a high oesophageal cancer area.

D. Stavrou, M. Hultén, A. P. Anzil and T. Bilzer: The humoral antibody response of rats immunized with chemically modified syngeneic brain cells and glioma cells.

R. H. Kramer, R. Gonzalez and G. L. Nicolson: Metastatic tumor cells adhere preferentially to the extracellular matrix underlying vascular endothelial cells.

A. W. Burgess and D. Metcalf: Characterization of a serum factor stimulating the differentiation of myelomonocytic leukemic cells.

T. Tsuruo, T. Yamori, S. Tsukagoshi and Y. Sakurai: Enhanced cytotoxic action of methotrexate by conjugation to concanavalin A.

F. Wiener, J. Spira, M. Babonits, N. Haran-Ghera and G. Klein: Non-random duplication of chromosome 15 in murine T-cell leukemias: Further studies on translocation heterozygotes.

A. M. Fulton and J. G. Levy: Inhibition of murine tumor growth and prostaglandin synthesis by indomethacin.

N. Hanna: Expression of metastatic potential of tumor cells in young nude mice is correlated with low levels of natural killer cell-mediated cytotoxicity.

P. C. Powell, M. Rennie, L. J. N. Ross and B. M. Mustill: The effect of bursectomy on the adoptive transfer of resistance to Marek's disease.
