Human Cancer

C. M. O'Toole, R. C. Tiptaft and A. Stevens: HLA antigen expression on urothelial cells: detection by antibody dependent cell mediated cytotoxicity.

H. Tulinius, N. E. Day, O. Bjarnason, G. Geirson, G. Johannesson, M. A. L. de Conzalez, H. Sigvaldason, G. Bjarnadottir and K. Grimsdottir: Familial breast cancer in Iceland.

D. M. Bolarin, E.-R. Savolainen and K. I. Kivirikko: Enzymes of collagen synthesis and type III procollagen amino-propeptide in serum from Nigerians with hepatocellular carcinoma and other malignant diseases.

A. Geser, G. de Thé, G. Lenoir, N. E. Day and E. H. Williams: Final case reporting from the Ugandan prospective study of the relationship between EBV and Burkitt's lymphoma.

S. K. Sundar, D. V. Ablashi, L. S. Kamaraju, P. H. Levine, A. Faggio, G. R. Armstrong, G. R. Pearson, G. R. F. Krueger, J. F. Hewetson, G. Bertram, K. Sesterhenn and J. Menezes: Sera from patients with undifferentiated nasopharyngeal carcinoma contain a factor which abrogates specific Epstein-Barr virus antigen-induced lymphocyte response.

R. Szigeti, J. Luka, L. Sternås and G. Klein: Migration inhibition caused by EBV specific 48 K subcomponent of EBNA and the associated 53 K cellular protein.

M. Rowe, J. E. K. Hildreth, A. B. Rickinson and M. A. Epstein: Monoclonal antibodies to Epstein-Barr virus-induced, transformation-associated cell surface antigens: binding patterns and effect upon virus-specific T-cell cytotoxicity.

H. F. Pross and M. G. Baines: Studies of human natural killer cells I. *In vivo* parameters affecting normal cytotoxic function.

Experimental Cancer

H. Binz, B. Meier and H. Wigzell: Induction or elimination of tumor-specific immunity against a chemically-induced rat tumor using auto-anti-idiotypic immunity.

M. Small: Tumor enhancing T lymphocytes in mice: characteristics and mechanism of activity.

T.-W. Tao and M. M. Burger: Lectin-resistant variants of mouse melanoma cells. 1. Altered metastasizing capacity and tumorigenicity.

F. Wiener, B. Babonits, J. Spira, G. Klein and H. Bazin: Banding and translocation homologies between non-random translocations t (6; 7) of rat immunocytomas and mouse plasmacytomas t (12; 15).

K. Nakanishi, Y. Kurata, M. Oshima, S. Fukushima and N. Ito: Carcinogenicity of phenacetin; long-term feeding study in B6C3F₁ mice.

S. Takahashi, B. Lombardi and H. Shinozuka: Progression of carcinogen induced foci of glutamyltranspeptidase positive hepatocytes to hepatomas in rats fed a choline-devoid diet.

M. Huleihel and M. Aboud: Effect of mouse interferon on cell-transformation and virus production in rat cells exogenously infected with Moloney murine sarcoma and leukemia viruses.

D. Sergiescu: Activation of an endogeneous mouse type C virus by u.v.-irradiated murine cytomegalovirus.

J. H. Ransom and C. H. Evans: Lymphotoxin enhances the susceptibility of neoplastic and preneoplastic cells to natural killer cell mediated destruction.

R. Ferracini, M. Prat and P. M. Comoglio: Antigenic determinants expressed on the cell surface of RSV transformed fibroblasts.

P. Marconi, A. Cassone, L. Tissi, M. Baccarini, P. Puccetti, E. Garad, E. Bonmassar and F. Bistoni: Cellular mechanisms underlying the adjuvant activity of *Candida albicans* in a mouse lymphoma model.
