Human Cancer

A. Hedin, B. Wahren and S. Hammarström: Tumor localization of CEA-containing human tumors in nude mice using monoclonal anti-CEA antibodies.

H. F. Stich, J. R. Curtis and B. B. Parida: Application of the micronucleus test to exfoliated cells of high cancer risk groups: tobacco chewers.

P. W. Andrews: Human embryonal carcinoma cells in culture do not synthesize fibronectin until they differentiate.

M. Miettinen, V.-P. Lehto, R. A. Badley and I. Virtanen: Expression of intermediate filaments in soft tissue sarcomas.

R.-S. Tan, Y.-C. Cheng, R. F. Naegele, W. Henle, R. Glaser and J. Champion: Antibody responses to Epstein-Barr virus-specific DNase in relation to the prognosis of juvenile patients with nasopharyngeal carcinoma.

J. F. Hewetson, P. H. Levine, R. H. Neubauer and H. Rabin: Discordant Epstein-Barr virus nuclear antigen (EBNA) antibody patterns in nasopharyngeal carcinoma.

P. Casellas, J. P. Brown, O. Gros, P. Gros, I. Hellström, F. K. Jansen, P. Poncelet, R. Roncucci, H. Vidal and K. E. Hellström: Human melanoma cells can be killed *in vitro* by an immunotoxin specific for melanoma-associated antigen p97.

R. Hill, S. K. Khoo, B. Daunter, P. A. Silburn and E. V. Mackay: Immunoglobulins reactive to carcinoembryonic antigen and their relationship to the antigen in malignant ascitic fluid of ovarian carcinoma.

S.-K. Liao, B. J. Clarke, M. Khosravi, P. C. Kwong, A. Brickenden and P. B. Dent: Human melanoma-specific oncofetal antigen defined by a mouse monoclonal antibody.

S. Mitrani-Rosenbaum, R. Ber, N. Goldblum, S. Povey, H. Gamliel and H. Ben-Bassat: Hybridization between a human epithelial line, infectable by Epstein-Barr virus, and Burkitt lymphoma lines: membrane properties, superinfectability, inducibility and tumorigenicity.

Experimental Cancer

I. A. Ramshaw, S. A. Carlsen, D. Hoon and R. C. Warrington: A 6-thioguanine-resistant variant of the 13762 cell line which is no longer tumorigenic or metastatic.

F. Zunino, F. Giuliani, G. Savi, T. Dasdia and R. Gambetta: Antitumor activity of daunorubicin linked to poly-L-aspartic acid.

C. C. Ting and S. S. Yang: Effect of interleukin 2 on cytotoxic effectors: I. Short term culture of the cytotoxic effectors and the *in vivo* anti-tumor activity of the cultured effectors isolated from tumor site.

S. Dzarlieva, V. Schirmacher and N. Fusenig: Cytogenetic changes during tumor progression towards invasion, metastasis and immune escape in the Eb/ESb model system.

Y. Kono, H. Sentsui, T. Miyamoto, K. Morozumi and Y. Sakamoto: Changes in antibody titers in cattle infected clinically and subclinically with bovine leukemia virus.

N. A. Wivel and P. M. Pitha: Interferon treatment of murine Meth A sarcoma cells: effects on the malignant phenotype and expression of tumor-specific and H-2 antigens.

G. O. Klein, K. Kärre, R. Kiessling and G. Klein: Thymus independence of hybrid resistance against a panel of T-cell lymphomas of H-2^b origin.

J. M. Lehman and P. Estes: Tumorigenicity of tsA and wild-type simian virus 40 transformed cells inoculated onto the chicken chorioallantoic membrane.

A. Benedetto, C. Amici, W. Djaczenko, S. Zaniratti and G. Elia: Acquisition of sensitivity to exogenous fibronectin by Friend leukemia cells correlates with the reduction of their tumorigenic potential.

T. Salo, L. A. Liotta, J. Keski-Oja, T. Turpeenniemi-Hujanen and K. Tryggvason: Secretion of basement membrane collagen degrading enzyme and plasminogen activator by transformed cells—role in metastasis.

P. Hartge, L. P. Leshner, L. McGowan and R. Hoover: Letter to the Editor: coffee and ovarian cancer.
