

The EUChemSoc Societies have taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further EUChemSoc Societies (Austria, Czech Republic and Sweden) are Associates of the two journals.

COVER PICTURE

The cover picture shows that acrolein, a mutagenic environmental pollutant formed during incomplete combustion, reacts with the cytosine base to yield exocyclic ring adducts. Identification and characterization of adducts are discussed in detail in the article by A. J. Pawłowicz, K. D. Klika, and L. Kronberg on p. 1429ff.
