

FOREWORD

This is the fifth volume of the Index of Biochemical Reviews and the largest in size, having increased by 37% compared with last year. We have continued to use the same arrangement of including reviews under one or more subject headings, which are also given in a separate contents list at the beginning for reference. As previously, published lectures and a number of books are included and although not comprehensive we hope that the listing of books will be useful. Additional information about books will be found in the book lists and book reviews which are published periodically in *FEBS Letters*.

Comments, criticisms and suggestions for improvements are always welcome and correspondence should be sent to Professor H.R.V. Arnstein, Department of Biochemistry, University of London King's College, Strand, London WC2R 2LS, England.

Further copies of this Index and back numbers, as listed below, may be purchased from Professor S. P. Datta, Department of Biochemistry, University College, Gower Street, London WC1E 6BT, England. For prices, see the insert in this Index, which may also be used as an order form.

We should like to thank Professor S.P.Datta for his continued interest and Miss Anna Straker for her help with some of the references as well as for her indispensable contribution in typing and preparing the copy for photo-reproduction with her usual skill and good-humoured patience.

London, June 1977
