

ERRATA

N.M. Lee, I. Wiedemann and E. Kun, Prevention of Ca^{2+} induced cation efflux from liver mitochondria by a cytoplasmic factor and by oligomycin, FEBS Letters 18 (1971) 81–83.

p. 82, left column, line 9, first word should read: substrates

V.G. Zaslavsky, N.V. Kaverin, Yu.A. Smirno and N.V. Syurina, The difference in buoyant density between viral and normal polyribosomes in Krebs II cells, FEBS Letters 17 (1971) 289–293.

p. 290, right column, fig. 2 A, B should be as: see fig. 2 A, B on p. 295. This replaces fig. 2 A, B on page 290.

N.V. Kaverin, Yu. A. Smirnov, N.V. Syurina and V.G. Zaslavsky, The effect of ionic strength on the buoyant density of polyribosomes in EMC virus-infected and uninfected Krebs II cells, FEBS Letters 17 (1971) 294–296.

p. 295, top of page, regarding figure 2, A, B: This figure should be replaced by the following figure:

B. Foltmann and B. Andersen, The primary structure of prochymosin (prorennin) EC 3.4.4.3. Some tryptic fragments of a maleylated preparation, FEBS Letters 17 (1971) 87–89.

p. 88, fig. 2 should read as: Residue nr. 10 in pepsinogen is Lys. The correct sequence is Pepsinogen: *Leu-Val-Lys-Val-Pro-Leu-Val-Arg-Lys-Lys-Ser-Leu-Arg*.
