

## ERRATUM

A.D. Wolfe, P. Dessen and D. Pantaloni, Direct measurement and kinetic analysis of the association of *E. coli* ribosomal subunits (1973) FEBS Letters 37, 112–116.

Page 113, fig. 2A was printed upside down. The whole of fig. 2 is printed below incorporating fig. 2A in the correct position:

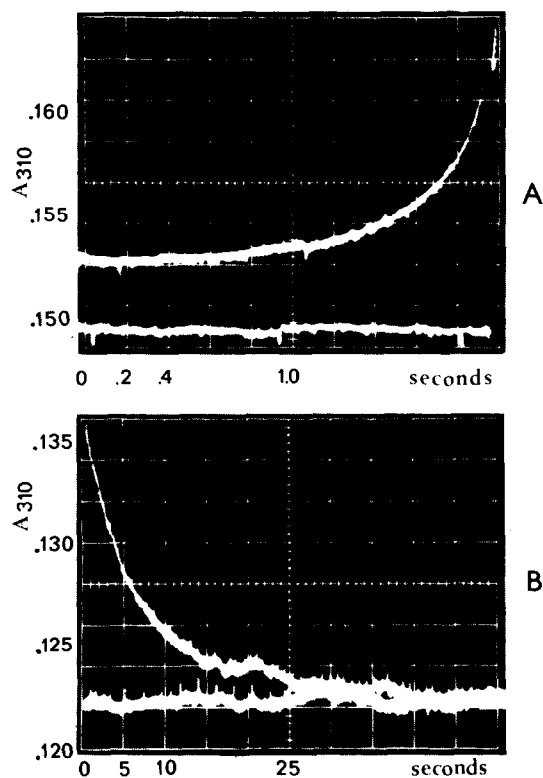

Fig. 2. Kinetics of  $\text{Mg}^{2+}$ -induced ribosomal subunit association (2 A) and EDTA-induced 70 S ribosome dissociation (2 B): A) mixing of ribosome solution in 1 mM  $\text{Mg}^{2+}$  with a 30 mM  $\text{Mg}^{2+}$  buffered solution. Time scale on abscissa: 0.2 sec/division; B) mixing of ribosome solution in 30 mM  $\text{Mg}^{2+}$  with a 100 mM EDTA buffered solution. Time scale on abscissa: 5 sec/division. Absorbance at 310 nm on ordinate (A and B), 0.002/division.
