

CONTENTS TO VOLUME 101

Research Letters

Principal folding pathway and topology of all- β proteins, <i>O. B. Ptitsyn, A. V. Finkelstein, P. Falk</i>	1
Towards theoretical prediction of protein quaternary structure, <i>A. A. Rashin, B. H. Yudman</i>	6
The delta helix — a possible left-handed stable polypeptide structure in the N-terminal segment of the <i>lac</i> repressor, <i>R. Chandrasekaran, T. S. Jardetzky, O. Jardetzky</i>	11
Purification of a microtubule-associated protein based on its preferential association with tubulin during microtubule initiation, <i>M. E. Stearns, D. L. Brown</i>	15
Different mobility in SDS—polyacrylamide gel electrophoresis of apolipoprotein E from phenotypes Apo E-N and Apo E-D, <i>G. Utermann, W. Weber, U. Beisiegel</i>	21
Spin-label study of segmental flexibility of anti-hapten antibodies: Precipitating pig anti-Dnp antibody is more flexible than non-precipitating, <i>Yu. K. Sykulev, V. P. Timofeev, R. S. Nezhlin, A. Yu. Misharin, F. Franěk</i>	27
^{25}Mg NMR linewidth as a probe in protein studies; application to bovine serum albumin and nitrogenase Fe protein, <i>E. O. Bishop, S. J. Kimber, B. E. Smith, P. J. Beynon</i>	31
Partial purification by guanosine-5'-diphosphate—agarose affinity chromatography of the 32 000 molecular weight polypeptide from mitochondria of brown adipose tissue, <i>D. Ricquier, C. Gervais, J. C. Kader, Ph. Hemon</i>	35
Resonance Raman spectrometric study of human blood platelets, <i>D. Aslanian, H. Vainer, J. Bolard, J.-P. Guesdon, M. Balkanski</i>	39
Isolation of human erythrocyte membranes and their outer surface proteins by covalent fractionation on solid support, <i>Y. Eshdat, A. Prujansky-Jakovovits</i>	43
Determination of enzyme activities with the enzyme thermistor unit, <i>B. Danielsson, K. Mosbach</i>	47
Protolytic equilibria of doxorubicin as determined by isoelectric focusing and 'electrophoretic titration curves', <i>P. G. Righetti, M. Menozzi, E. Gianazza, L. Valentini</i>	51
Evidence for a functional oxygen-bound intermediate in the reaction of <i>Escherichia coli</i> cytochrome <i>o</i> with oxygen, <i>R. K. Poole, A. J. Waring, B. Chance</i>	56
Irreversible binding of 5-hydroxytryptamine and 5-hydroxytryptophan metabolites to rat liver microsomal protein, <i>T. Uemura, H. Matsushita, M. Ozawa, A. Fiori, E. Chiesara</i>	59
Effect of malonyl-CoA on calcium uptake and pyridine nucleotide redox state in rat liver mitochondria, <i>P. E. Wolkowicz, J. McMillin Wood</i>	63
Na^+, K^+ -ATPase: ligand-induced alterations in subunit crosslinking, <i>W.-H. Huang, A. Askari</i>	67
Two sequence-specific endonucleases from <i>Anabaena oscillarioides</i> , <i>A. de Waard, C. P. van Beveren, M. Duyvesteyn, H. van Ormondt</i>	71
Strain-dependent variation of the protein composition of <i>Tetrahymena</i> ribosomes, <i>M. Cuny, M. Milet, D. H. Hayes</i>	77
Guanine nucleotide-controlled interactions between components of adenylate cyclase, <i>T. Pfeuffer</i>	85

Induction of phytoalexin synthesis in soybean. Dimethylallylpyrophosphate: trihydroxypterocarpan dimethylallyl transferase from elicitor-induced cotyledons, <i>U. Zähringer, J. Ebel, L. J. Mulheirn, R. L. Lyne, H. Grisebach</i>	90
Fidelity of protein synthesis in vitro is increased in the presence of spermidine, <i>A. K. Abraham, S. Olsnes, A. Pihl</i>	93
Two pathways of cysteine biosynthesis in <i>Saccharomycopsis lipolytica</i> , <i>E. Morzycka, A. Paszewski</i>	97
Light-induced EPR signals at cryogenic temperatures in subchloroplast particles enriched in photosystem II, <i>J. H. A. Nugent, M. C. W. Evans</i>	101
Detection by EPR spectrometry of a new intermediate in the primary photochemistry of photosystem I particles isolated using Triton X-100, <i>P. Heathcote, K. N. Timofeev, M. C. W. Evans</i>	105
Detection of allophycocyanin in photosystem I preparations from the blue-green alga, <i>Chlorogloea fritschii</i> , <i>C. A. Pullin, R. G. Brown, E. H. Evans</i>	110
Interaction of ionophores with bacteriorhodopsin – a flash photometric study, <i>M. Brith-Lindner, Y. Avi-Dor</i>	113
Activation of ALA synthetase by reduced thioredoxin in <i>Rhodopseudomonas sphaeroides</i> Y, <i>J. D. Clement-Metral</i>	116
Photoreaction of <i>trans</i> -bacteriorhodopsin at liquid helium temperature, <i>T. Iwasa, F. Tokunaga, T. Yoshizawa</i>	121
Hydrogen evolution from immobilized cultures of the cyanobacterium <i>Anabaena cylindrica</i> B629, <i>G. R. Lambert, A. Daday, G. D. Smith</i>	125
The chromaffin granule surface: the presence of actin and the nature of its interaction with the membrane, <i>D. I. Meyer, M. M. Burger</i>	129
Active uptake of serotonin by blood platelets of schizophrenic patients, <i>A. Rotman, I. Modai, H. Munitz, H. Wijsenbeek</i>	134
Enzymatic processing of precursors of ovine lactoproteins by mammary microsomal membranes and a deoxycholate-soluble extract from rough microsomes, <i>P. Gaye, D. Hue, J.-C. Mercier, G. Haze</i>	137
Action of triiodothyronine on the synthesis of rat ventricular myosin isoenzymes, <i>J. F. Y. Hoh, L. J. Egerton</i>	143
In vitro inhibition of rat liver tryptophan oxygenase by 4-hydroxypyrazole, <i>H. Rouach, G. Ribiere, J. Nordmann, R. Nordmann</i>	149
A sulphhydryl group is not essential for the binding of GDP to elongation factor Tu, <i>A. Wittinghofer, R. Leberman</i>	153
Structure–function relationships in <i>Escherichia coli</i> initiation factors. II. Elucidation of the primary structure of initiation factor IF-1, <i>C. L. Pon, B. Wittmann-Liebold, C. Gualerzi</i>	157
The amino acid sequence of profilin from calf spleen, <i>L.-E. Nyström, U. Lindberg, J. Kendrick-Jones, R. Jakes</i>	161
Heavy meromyosin- and ATP-binding protein from <i>Escherichia coli</i> , <i>A. Someya, N. Tanaka</i>	166
RNA in potato leafroll virus, <i>H. Mehrad, H. Lapierre, P. Yot</i>	169
Emulsifier of arthrobacter RAG-1: Determination of emulsifier-bound fatty acids, <i>I. Belsky, D. L. Gutnick, E. Rosenberg</i>	175
Identification and purification of a nicotinamide adenine dinucleotide-dependent secondary alcohol dehydrogenase from <i>C₁</i> -utilizing microbes, <i>C. T. Hou, R. N. Patel, A. I. Laskin, N. Barnabe, I. Marczak</i>	179
S-Adenosylhomocysteine hydrolase in human and rat liver is localized to the cytosol fraction of the tissue homogenate, <i>P. M. Ueland, R. K. Berge, J. Sæbø, M. Farstad</i>	184
Inhibition of rat liver glutathione S-transferase activity by aprotic solvents, <i>A. Aitio, J. R. Bend</i>	187
Synthesis and isolation of a glucagon antagonist, <i>M. D. Bregman, V. J. Hruby</i>	191
Spin-labelled isocyanides as stereochemical probes for the active center of cytochrome P-450, <i>J. Pirrwitz, H. Rein, G. Lassmann, G. R. Jänig, S. Pečar, K. Ruckpaul</i>	195

Secondary electron transfer in chromatophores of <i>Rhodopseudomonas capsulata</i> A1a pho ⁺ : Binary out-of-phase oscillations in ubisemiquinone formation and cytochrome <i>b</i> ₅₀ reduction with consecutive light flashes, <i>J. R. Bowyer, G. V. Tierney, A. R. Crofts</i>	201
Cytochrome <i>c</i> ₂ —reaction centre coupling in chromatophores of <i>Rhodopseudomonas sphaeroides</i> and <i>Rhodopseudomonas capsulata</i> , <i>J. R. Bowyer, G. V. Tierney, A. R. Crofts</i>	207

Review Letter

Hormone-receptor—adenylate cyclase interactions, <i>A. Levitzki, E. J. M. Helmreich</i>	213
---	-----

Hypothesis

A possible involvement of coding sequences in mRNA—ribosome interaction in eukaryotes, <i>G. W. Both</i>	220
--	-----

Research Letters

Ribosomes of rat liver catalyze 'minimal' donor reaction, <i>M. K. Kukhanova, A. A. Kravetsky, B. P. Gottikh, J. Stahl</i>	225
Encapsulation of high molecular weight DNA in large unilamellar phospholipid vesicles: dependence on the size of the DNA, <i>R. J. Mannino, E. S. Allebach, W. A. Strohl</i>	229
Inhibition of nucleoside and sugar transport into cells by an oncostatic methylase inhibitor, 5'-deoxy-5'-S-isobutylthioadenosine (SIBA), <i>A. Pierré, M. Robert-Géro</i>	233
Stimulation of uptake of cholesteryl esters into adrenal tumor cells by ACTH and other agents, <i>M. Watanuki, P. F. Hall</i>	239
The direction of transpeptidation during cell wall peptidoglycan biosynthesis in <i>Bacillus megaterium</i> , <i>A. F. Giles, P. E. Reynolds</i>	244
Activation of spinach ribulose biphosphate carboxylase by pyridoxal phosphate, <i>W. B. Whitman, C. Colletti, F. R. Tabita</i>	249
Enzymatic synthesis of acyl—acyl carrier protein and assay of acyl carrier protein, <i>A. K. Spencer, A. D. Greenspan, J. E. Cronan, jr</i>	253
Lectin from embryonic chick muscle that interacts with glycosaminoglycans, <i>D. Kohler, S. H. Barondes</i>	257
The location of glycerol phosphate acyltransferase and fatty acyl CoA synthase on the inner surface of the mitochondrial outer membrane, <i>H. G. Nimmo</i>	262
Identification of a new basement membrane collagen by the aid of a large fragment resistant to bacterial collagenase, <i>R. Timpl, J. Risteli, H. P. Bächinger</i>	265
Synthesis and degradation of collagen by skin fibroblasts from controls and from patients with osteogenesis imperfecta, <i>B. U. Steinmann, G. R. Martin, B. I. Baum, R. G. Crystal</i>	269
Specific pattern of glycosphingolipids in a mucosa scraping of human small intestine, <i>K. Falk, K.-A. Karlsson, H. Leffler, B. E. Samuelsson</i>	273
Isolated hepatocytes as a model for the study of stable glucagon effects on mitochondrial respiratory functions, <i>E. A. Siess, O. H. Wieland</i>	277
Lactate and pyruvate metabolism in isolated human kidney tubules, <i>G. Baverel, M. Bonnard, M. Pellet</i>	282
The effect of a varying Mg_{free}^{++} concentration upon the kinetic behaviour of human liver L-type pyruvate kinase, <i>E. D. Sprengers, G. E. J. Staal</i>	287
Identification of L-type pyruvate kinase as a major phosphorylation site of endogenous cyclic AMP-dependent protein kinase in rat liver soluble fraction, <i>G. B. van den Berg, T. J. C. van Berkel, J. F. Koster</i>	289
The number of subunits in bovine cytochrome <i>c</i> oxidase, <i>T. Penttilä, M. Saraste, M. Wikström</i>	295

Stoichiometric enzyme-peptide conjugation on an affinity matrix, <i>S. Pillai, B. K. Bachhawat</i>	301
Isolation and partial characterization of membrane-bound ferredoxin-NADP ⁺ -reductase from chloroplasts, <i>K.-H. Süß</i>	305
Immobilization of photochemically-active chloroplasts onto diethylaminoethyl-cellulose, <i>Y. Shioi, T. Sasa</i>	311
Kinetic analysis of light-dependent exchange of adenine nucleotides on chloroplast coupling factor CF ₁ , <i>H. Strotmann, S. Bickel-Sandkötter, V. Shoshan</i>	316
Transient variation of photoacoustic signal from leaves accompanying photosynthesis, <i>Y. Inoue, A. Watanabe, K. Shibata</i>	321
A rapid procedure for the preparation of light harvesting chlorophyll <i>a/b</i> protein complex: An assessment of its manganese content, <i>C. H. Foyer, D. O. Hall</i>	324
Selective substitution of ² H and ³ H into aromatic amino acids catalyzed by Raney nickel, <i>R. C. Woodworth, C. M. Dobson</i>	329
The production of hydroxyl radical by tallsomycin and copper(II), <i>G. R. Buettner, L. W. Oberley</i>	333
A C-terminal haem-bound cytochrome <i>c</i> -556 from <i>Agrobacterium tumefaciens</i> , strain B ₂ a: Amino acid composition and N-terminal sequence analysis, <i>J. van Beeumen, C. van den Branden, P. Tempst, J. de Ley</i>	336
On the energy requirements of fatty acid synthesis in spinach chloroplasts in the light and in the dark, <i>H. Kleinig, B. Liedvogel</i>	339
Cadaverine-pyruvate transamination: the principal step of enzymatic quinolizidine alkaloid biosynthesis in <i>Lupinus polyphyllus</i> cell suspension cultures, <i>M. Wink, T. Hartmann</i>	343
Cyclic AMP-independent glycogen synthase kinase from rat liver, <i>E. Itarte, A. Mor, J. M. Pena, A. Salavert, R. Cussó, J. J. Guinovart</i>	347
Mitochondrial bovine aspartate aminotransferase: Preliminary sequence and crystallographic data, <i>S. Capasso, A. M. Garzillo, G. Marino, L. Mazzarella, P. Pucci, G. Sannia</i>	351
Participation of a mitochondrial proteinase in the breakdown of mitochondrial translation products in yeast, <i>S. L. Kalnov, L. A. Novikova, A. S. Zubatov, V. N. Luzikov</i>	355
Common structural features in DNA around the replication origin of Papova virus, mouse polyoma virus, Simian virus 40 and human BKV, <i>E. Soeda, K.-i. Miura</i>	359
Hormonal protection of interferon-treated cells against double-stranded RNA-induced cytolysis, <i>D. Wallach, M. Revel</i>	364
Transcription in nuclei isolated from tobacco tissues, <i>H. Bouman, A. M. Mennes, K. R. Libbenga</i>	369
Synthesis of a larger precursor for the proteolipid subunit of the mitochondrial ATPase complex of <i>Neurospora crassa</i> in a cell-free wheat germ system, <i>R. Michel, E. Wachter, W. Sebald</i>	373
Protein S, a new vitamin K-dependent protein from bovine plasma, <i>J. Stenflo, M. Jönsson</i>	377
The formation of 2,3-dihydro-2,3-dihydroxy aflatoxin B ₁ by the metabolism of aflatoxin B ₁ in vitro by rat liver microsomes, <i>G. E. Neal, P. J. Colley</i>	382
Reductive methylation of IF-3 and EFTu with [¹⁴ C]formaldehyde and sodium cyanoborohydride, <i>L. A. MacKeen, C. DiPeri, I. Schwartz</i>	387
Identification of MSEL and VLDV neurophysins in human pituitary gland, <i>M. T. Chauvet, J. Chauvet, R. Acher, A. G. Robinson</i>	391
A comparison of the subunits of the acetylcholine receptor from electric eel and <i>Torpedo californica</i> , <i>K. Sumikawa, R. D. O'Brien</i>	395
Fluorometric study with 1-anilino-8-naphthalene sulphonate on membrane surface charge changes induced by inhalation anaesthetics, <i>C. Okuda, K. Ogli</i>	399
Is the active form of pyridoxal-P in α -glucan phosphorylases a 5'-phosphate dianion?, <i>D. Palm, K.-H. Schächtele, K. Feldmann, E. J. M. Helmreich</i>	403

Effect of chelating agents and phosphoramidon on the L-leucine transport system in microvillar vesicles from pig kidney, <i>A. J. Kenny, D. M. O'Halloran</i>	407
Differences in heat production between adipocytes from obese and normal weight individuals, <i>R. Sörbis, P. Nilsson-Ehle, M. Monti, I. Wadsö</i>	411
