

## Contents to volume 147

## Meeting Report

- International symposium on translational/transcriptional regulation of gene expression, *B. Safer, M. Grunberg-Manago, D. Badman, F. Bergman, C. Freeman, G. Galasso, R. Jagus, B. Williams* 1

## Hypothesis

- cI* and *lexA* Repressors consist of three *cro*-like domains, *O.B. Ptitsyn, A.V. Finkelstein, M.P. Kirpichnikov, K.G. Skryabin* 11
- The 695 nm fluorescence emission ( $F_{695}$ ) of chloroplasts at low temperature is emitted from the primary acceptor of photosystem II, *J. Breton* 16

## Research Letters

- Localisation of a strongly conserved section of coding sequence in glutamate dehydrogenase genes, *I.W. Mattaj, M.J. McPherson, J.C. Wootton* 21
- Movement of amino acids into isolated plant mitochondria, *M.O. Proudlove, A.L. Moore* 26
- $\beta$ -D-Galactoside transport in *Escherichia coli*:  $M_r$  determination of the transport protein in organic solvent, *B. König, H. Sandermann jr* 31
- Activation of phosphorylated branched chain 2-oxoacid dehydrogenase complex, *H.R. Fatania, K.S. Lau, P.J. Randle* 35
- 500 MHz  $^1\text{H}$  NMR of phospholipid liposomes: Lanthanide shift of glycerol- $\gamma$  and acyl-chain C2 resonances, *L. Michaelis, P. Schlieper* 40
- Isolation of a GABA receptor from bovine brain using a benzodiazepine affinity column, *E. Sigel, C. Mamalaki, E.A. Barnard* 45
- Analysis of hepatic growth hormone binding sites of pregnant rabbit crosslinked to  $^{125}\text{I}$ -labelled human growth hormone, *T. Tsushima, H. Murakami, K. Wakai, O. Isozaki, Y. Sato, K. Shizume* 49
- Isolation and characterisation of active fragments of protein phosphatase inhibitor-1 from rabbit skeletal muscle, *A. Aitken, P. Cohen* 54
- Variations in the susceptibility of erythrocyte membrane glycolipids to galactose oxidase, *H. Lis, C.L. Jaffe, N. Sharon* 59
- Human hybridoma cells produced by electro-fusion, *R. Bischoff, R.M. Eisert, I. Schedel, J. Vienken, U. Zimmermann* 64
- Phosphorescence of tryptophan from parvalbumin and actin in liquid solution, *T. Horie, J.M. Vanderkooi* 69
- Carbon dioxide hydration activity and metal-substrate distances of manganese (II) human carbonic anhydrase B determined by  $^{13}\text{C}$  magnetization transfer NMR, *J.L. Led, E. Neesgaard, J.T. Johansen* 74
- Resonance Raman scattering from *Rhodospseudomonas sphaeroides* reaction centers adsorbed on a silver electrode, *T.M. Cotton, R.P. van Duyne* 81
- Identification of the 110 000  $M_r$  glycoprotein isolated from rat liver plasma membrane as dipeptidylaminopeptidase IV, *W. Kreisel, R. Heussner, B. Volk, R. Büchsel, W. Reutter, W. Gerok* 85
- Mapping of 8-metoxypsoralen binding sites in DNA within phage  $\lambda$  particles, *M.A. Shurdov, T.G. Popova* 89
- Characteristics of an ATP-dependent proteolytic system of rat liver mitochondria, *S. Rapoport, W. Dubiel, M. Müller* 93
- The mitochondrially made subunit 2 of *Neurospora crassa* cytochrome *aa<sub>3</sub>* is synthesized as a precursor protein, *P. van den Boogaart, S. van Dijk, E. Agsteribbe* 97
- The inhibition of proton translocation in the mitochondrial *bc<sub>1</sub>* region by dicyclohexylcarbodiimide, *M.D. Esposti, J.B. Saus, J. Timoneda, E. Bertoli, G. Lenaz* 101

An investigation by iron K-edge spectroscopy of the oxidation state of iron in hemoglobin and its subunits, <i>S. Spin, B. Alpert, A. Michalowicz</i>	106
Investigation of the iron components in photosystem II by Mössbauer spectroscopy, <i>V. Petrouleas, B.A. Diner</i>	111
Kinetics of electron transfer in duroquinone-reconstituted reaction centers from photosynthetic bacteria, <i>A.G. Pocinki, R.E. Blankenship</i>	115
Identification of N- and C-terminal corticotropin peptides in the 80 000 $M_r$ form of neurophysin, <i>D. Garnier, A. Morel, P. Beguin, P. Cohen</i>	120
Calmodulin carboxymethylester formation in intact human red cells and modulation of this reaction by divalent cations in vitro, <i>L. Runte, H.L. Jürgensmeier, C. Unger, H.D. Söling</i>	125

### Hypothesis

A possible novel interaction between the 3'-end of 18 S ribosomal RNA and the 5'-leader sequence of many eukaryotic messenger RNAs, <i>D.R. Sargan, S.P. Gregory, P.H.W. Butterworth</i>	133
--	-----

### Research Letters

A mutant $\beta$ -D-glucoside transport system in <i>Escherichia coli</i> resistant to catabolite inhibition, <i>C.M. Elvin, H.L. Kornberg</i>	137
Non-vectorial phosphorylation by the bacterial PEP-dependent phosphotransferase system is an artifact of spheroplast and membrane vesicle preparation procedures, <i>G.T. Robillard, R.G. Lageveen</i>	143
Altered cGMP-phosphodiesterase activity in chemotactic mutants of <i>Dictyostelium discoideum</i> , <i>P.J.M. van Haastert, M.M. van Lookeren Campagne, F.M. Ross</i>	149
Asymmetric synthesis of ethanolamine phospholipids in chicken brain microsomes, through the cytidine pathway, <i>J. Dominski, L. Binaglia, G. Porcellati, L. Freysz</i>	153
Protein synthesis by developing plastids isolated from <i>Euglena gracilis</i> , <i>M.E. Miller, C.A. Price</i>	156
Distribution of calmodulin within wheat leaf cells, <i>S. Muto</i>	161
Effect of S-100 proteins and calmodulin on $Ca^{2+}$ -induced disassembly of brain microtubule proteins in vitro, <i>J. Baudier, C. Briving, J. Deinum, K. Haglid, L. Sörskog, M. Wallin</i>	165
Acetylcholine receptor-rich membranes contain an endogenous protease regulated by peripheral membrane protein, <i>J. Verdenhalven, G. Bandini, F. Hucho</i>	168
Regulation of phosphatidylglycerol and phosphatidylinositol synthesis in alveolar type II cells isolated from adult rat lung, <i>J.J. Batenburg, W. Klazinga, L.M.G. van Golde</i>	171
The design of a new group of angiotensin-converting enzyme inhibitors, <i>C.H. Hassall, A. Kröhn, C.J. Moody, W.A. Thomas</i>	175
Leukotriene-induced neutrophil aggregation in vitro, <i>B. Ringertz, J. Palmblad, O. Rådmark, C. Malmsten</i>	180
Activation of lipoprotein lipase by apolipoprotein CII. Demonstration of an effect of the activator on the binding of the enzyme to milk fat globules, <i>G. Bengtsson, T. Olivecrona</i>	183
Quantitative detection and biochemical characterization of high- $M_r$ forms of vasopressin in the rat hypothalamo-posthypophyseal system: Effect of water deprivation and rehydration, <i>A. Cupo, G. Rougon-Rapapuzzi, P.A. Pontarotti, M.A. Delaage</i>	188
Evidence for the renal paratubular transport of glutathione, <i>B.B. Rankin, N.P. Curthoys</i>	193
The interaction of acetylcholinesterase with carbodiimides: Irreversible inhibition with 1-cyclohexyl-3-(2-morpholinoethyl) carbodiimide metho- <i>p</i> -toluenesulfonate, <i>D. Segal, Y. Shalitin</i>	197
The structure of the cell wall of <i>Staphylococcus aureus</i> studied with neutron scattering and magnetic birefringence, <i>J. Torbet, M.Y. Norton</i>	201
Nuclear glycogen synthase — Fact or artifact?, <i>M. Kopun, H. Spring, C. Granzow</i>	207
Insulin affects only initiation and not elongation in protein synthesis in soleus muscles of lean and obese mice, <i>S. Monier, Y. le Marchand-Brustel</i>	211

Replicon fusion in mouse cells is very sensitive to DNA damage induced by <i>N</i> -methyl- <i>N'</i> -nitro- <i>N</i> -nitrosoguanidine, <i>E. Wintersberger, I. Mudrak</i>	215
Some properties of a blue copper protein 'plantacyanin' from cucumber peel, <i>T. Sakurai, H. Okamoto, K. Kawahara, A. Nakahara</i>	220
Does the sarcoplasmic reticulum achieve chemiosmotic equilibrium in relaxed muscle? <i>R. Jeacocke</i>	225
Linear and 'lasso-like' structures of mitochondrial DNA from <i>Pennisetum typhoides</i> , <i>B.D. Kim, K.J. Lee, A.G. DeBusk</i>	231
Physiological alteration of the pattern of transcription of the <i>oli2</i> region of yeast mitochondrial DNA, <i>M.W. Beilharz, G.S. Cobon, P. Nagley</i>	235
The turnover of cytochrome P450b, <i>R. Gasser, H.P. Hauri, U.A. Meyer</i>	239
Involvement of calcium, calmodulin and phospholipase A in the alteration of membrane dynamics and superoxide production of human neutrophils stimulated by phorbol myristate acetate, <i>R. Stocker, C. Richter</i>	243
Structural study of hemoglobin Knossos, $\beta 27$ (B9) Ala $\rightarrow$ Ser: A new abnormal hemoglobin, present as a silent $\beta$ -thalassemia. <i>N. Arous, F. Galacteros, Ph. Fessas, D. Loukopoulos, Y. Blouquit, G. Komis, M. Sellaye, M. Boussiou, J. Rosa</i>	247
Particulate phosphofructokinase of yeast: physiological studies, <i>M. Nadkarni, S. Lobo, P.K. Maitra</i>	251
Reaction of chloroacetyl-CoA with rabbit fatty acid synthase: A new method to label specifically and quantify pantetheine prosthetic groups, <i>A.D. McCarthy, D.G. Hardie</i>	256
Isolation and NH <sub>2</sub> -terminal sequence of a novel porcine anterior pituitary polypeptide: Homology to proinsulin, secretin and Rous sarcoma virus transforming protein TVFV60, <i>K.L. Hsi, N.G. Seidah, G. de Serres, M. Chrétien</i>	261
The primary structure of human $\beta$ -lipotropin: Further peptide sequencing resolves the controversy and suggests the existence of only one human $\beta$ -lipotropin, <i>N.G. Seidah, K.L. Hsi, M. Chrétien, E. Barat, A. Patthy, L. Graf</i>	267
