ANATECH '86—AN INTERNATIONAL SYMPOSIUM ON THE APPLICATIONS OF ANALYTICAL CHEMICAL TECHNIQUES TO INDUSTRIAL PROCESS CONTROL

An international symposium on the applications of analytical chemical techniques to industrial process control will be held in Noordwijkerhout, The Netherlands, from 22 to 24 April, 1986. The symposium is aimed at an interdisciplinary audience of those involved in process engineering, as well as at analytical chemists. Topics to be covered include: (1) the state of the art of analytical techniques already successfully applied in process analysis; (2) the development of strategies for the selection of analytical procedures with regard to optimum process control; and (3) new analytical techniques of possible interest for process control.

The scientific programme will consist of invited plenary lectures, invited and submitted research papers (both oral and poster presentations) and discussion sessions. The symposium language will be English. It is planned to hold an exhibition of scientific products and equipment in conjunction with the symposium.

Further information may be obtained from: Professor W. E. van der Linden, Laboratory for Chemical Analysis, Department of Chemical Technology, Twente University of Technology, PO Box 217, 7500 AE Enschede, The Netherlands.
