

Announcement

The Ninth International LIMS Conference and Exhibition A Welcome Move

7-9 June 1995

The Maritim Hotel, Bonn

LIMS-95 is to be held for the first time in Bonn at the Maritim Hotel on 7-9 June 1995. LIMS-95 is the ninth in a series of International Conferences on Laboratory Information Management Systems which are held in Europe and the USA on alternate years. On previous occasions the European venue has been in the UK but because of the importance of the topic of European industry the event has been moved to mainland Europe. This move has been welcomed by both the vendors and the speakers.

The successful exhibition of LIMS equipment has been expanded to include Laboratory Software and Data Processing Equipment and more exhibition space has been sold than on any previous occasion. Exhibitors who have reserved stands include:

Axiom, Beckman, Compex, Creon, Fisons, Hewlett-Packard, ICD, Lab. Micro Systems, Labware, Perkin-Elmer, SEMA, T & P Unternehmans., Varian and Wilnor.

Also for the first time parallel conference sessions will be held to cover all of the topics of interest, with special sessions for new users and for small laboratories as well as sessions covering large systems, integration with other operations, instrument connections and data processing.

Building on the success of the breakout sessions that were introduced at the last conference these have been extended to include vendor workshops, which will give the conference delegates an opportunity of looking in detail at special features of the vendor's products.

The conference, which is being organised by The Royal Society of Chemistry in collaboration with

Eurachem and the European section of AOAC International, has attracted support from the E.U. Measurements and Testing Programme.

LIMS-95 will build on the success of the previous conferences and demonstrate once again that this is the premier event in this field.

Notes for Editors

1. Laboratory Information Management Systems (LIMS) were once the province of just the larger pharmaceutical companies but with the advent of medium cost and PC based systems, there are systems suitable for the needs of all laboratories, large or small, single or multi product.

These systems not only form an essential part of the laboratory's QA system but also provide the information required for its efficient operation.

2. Enquiries regarding the conference should be addressed to:

Jay Conference Services, 45 Hilltop Avenue,
Hullbridge, Hockley, Essex, SS5 6BL, UK;
Tel: +44 1702 231268; Fax: +44 1702 232961.

and about the exhibition to:

Jim Wiseman, Coordinate Exhibition Services Ltd,
43 London Road, Biggleswade, Bedfordshire,
SG18 8ED, UK; Tel: +44 1767 601321; Fax: +44
