

EDITORIAL

This is the first of six issues of Glycoconjugate Journal which are planned to constitute Volume 2. Whether we are able to publish six issues is of course dependent on the number and quality of articles submitted.

This issue contains the "usual" extra sections, although **Personal News** is included only for the sake of continuity since no information has been received recently. Although "no news is good news" is a well known axiom, we would like to hear the good news. Anyway, we shall persevere a little longer with this section.

PERSONAL NEWS

Glycoconjugate researchers are frequently on the move, and some have even been known to obtain promotions or receive honours and prizes. This is also of interest to colleagues throughout the world, so news items will be published regularly in this Journal. **Please inform us!**

No news has reached this office since the last issue. Surely *something* must have happened?
