

EDITORIAL

Few of our regular readers will have failed to notice that this issue of Glycoconjugate Journal is thicker than usual. The simple explanation is that, in addition to the usual papers on diverse aspects of glycoconjugate research, this issue contains Meeting Abstracts.

The meeting in question is the 17th Annual Meeting of the (American) Society for Complex Carbohydrates, which is being organised by Alan D. Elbein and will take place in San Antonio, TX, USA on November 3-5, 1988.

The Abstracts have not been reviewed by members of the Editorial Board of Glycoconjugate Journal and thus the quality of the information printed is the sole responsibility of the authors and not this Journal. However, we feel that the Abstracts will give our readers a useful insight into the latest developments in glycoconjugate research in the USA.
