

Index to Volume 19

Subject Index

- A**
N-acetylglucosaminyltransferase III
 in chronic liver disease, monoclonal antibody
 determination of, 415
N-acetylglucosaminyltransferase III deficiency
 bisected *N*-glycan production in mice, 211
Agglutination
 wheat germ, in erythrocyte aging, 1
Aggrecan
 knockout mice, chondrodysplasia in, 269
Airway epithelium
 MUC1 O-glycosylation in, 379
Allergies
 inflammation and galectins, 601
Amphibians
 Xenopus laevis, brain gangliosides structure, 53
 Xenopus laevis, glycosyltransferases in, 187
Amyotrophic lateral sclerosis
 galectin-1 in, 479
Angiogenesis
 galectin-3 and, 544
Anoikis
 galectin-3 and, 545
Anopheles gambiae
 galectins in, 607
Anticoagulant heparan sulfate (HS^{act}), 355
Antifibrosis
 hepatic, targeted glycyrrhizin delivery for, 423
Antigens, glycopeptide
 T-cell hybridoma characterization, 59
Apomucins
 MUC1 and MUC5AC, glycosylation in
 HT-29/M3 colon cancer cells, 13
Apoptosis
 galectin regulation of, 507, 565
 galectin-1 and, 467
 galectin-8 and, 510
 galectin-9 and, 519, 598
 galectin-12 and, 510
Autoimmune diseases
 IgG oligosaccharides in, 23
Autoimmunity
 galectins and, 565
- B**
B lymphocytes
 galectins and physiology of, 569
Bacterial adhesion
 bovine *E. coli* strains, 5
Beckwith-Wiedemann syndrome
 glypican-3 mutations in, 320
Bernfield, Merton
 obituary, 225
- Beta cells
 sulfatide expression in RIN-38 microdomains,
 403
BGal(1-3) α GalNAc-O/Ser (Core-1)
 T-cell hybridoma response, 59
Biglycan knockout mice
 as musculoskeletal disease models, 257
Bikunin
 chondroitin sulfate and, 241
Binding proteins
 Mac-2, in tumor progression and metastasis,
 551
Binding specificity
 of galectins, thermodynamics, 459
Blood group B
 trisaccharide recognition by *Marasmius*
 oreades lectin, 175
Bone development
 perlecan in, 263
Bradyrhizobium
 peanut specific GN17 strains,
 lipopolysaccharide mutant characterization,
 395
- C**
Ca(2+)-transporting ATPase
 plasma membrane, heparin inhibition of,
 373
Caenorhabditis elegans
 as proteoglycan model, 325
Calcitonin
 O-glycosylation induced structural changes in
 α -helix, NMR analysis, 43
Calcium pump
 heparin inhibition of, 373
Calves
 milk oligosaccharide binding by
 enterotoxigenic *E. coli* strains, 5
Cancer. *See also* Carcinogenesis
 galectin-9 and prognosis, 598
 galectin-8 isoforms and, 557
 galectin expression in, 537
 galectins and Mac-2 binding protein, 551
Carbohydrate molecular chains, 161
Carbohydrate recognition domains
 conger eel galectins, swapping and molecular
 evolution, 451
 galectin-3, 527
 galectins, 434
Carcinogenesis
 galectin-1 and tumor cell proliferation, 471
 hyaluronan in, 337
 Mac-2 binding protein in, 551
- Cardiac development
 hyaluronan in, 331
Cartilage. *See also* Chondrodysplasia
 development, perlecan and, 263
 matrix deficiency, 269
Cell adhesion
 galectin-3 modulation, 530, 545, 576
 galectin-8 modulation, 517
 galectin-9 modulation, 597
Cell aggregation
 galectin-9 and, 597
Cell aging
 wheat germ agglutinin distribution in
 erythrocytes, 1
Cell cycle
 galectin regulation of, 507
Cell death. *See* Apoptosis
Cell density
 subculture progression and gangliosides in
 human fibroblasts, 181
Cell differentiation
 galectin-9 in, 596
Cell division
 galectin-1 inhibition of, 467
Cell growth
 galectins and, 507, 517
Cell lines
 airway epithelium vs. colon carcinoma, MUC1
 O-glycosylation, 379
Cell migration
 syndecan-4 and, 305
Cell signaling
 syndecan-4 and, 305
Cells, cultured
 density and subculture progression, 181
Chondrodysplasia
 in aggrecan and link protein knockout mice,
 269
 perlecan in, 263
Chondroitin sulfate
 in bikunin physiology, 241
Chromatography, ion exchange
 lipopolysaccharide mutant characterization in
 Bradyrhizobium GN17, 395
Collagen
 decorin in fibrillogenesis, 249
 fibril abnormalities and small leucine-rich
 proteoglycans, 287
Colon cancer cells
 HT-29/M3, FUT1 expression and apomucin
 glycosylation, 13
Connective tissue defects
 lumican and fibromodulin in, 287

- Core-1 glycans
T-cell hybridoma response, 59
- Core proteins, 230
- Cryptococcus neoformans*
sialylglycoconjugates and sialyltransferase in, 165
- Cumulus oophorus
bikunin and hyaluronan in, 241
- D
- Decorin
in collagen fibrillogenesis and skin homeostasis, 249
- Dermal fibroblasts
galectin-1 and development of, 615
- Dermatan sulfate proteoglycan
in collagen fibrillogenesis, 249
- Diabetic nephropathy
galectin-3 in, 627
- Drosophila*
galectins in, 607
glypican mutations in, 319
heparan sulfate proteoglycan signaling regulation, 363
phenotypes and signaling, 363
syndecans in, 295
- E
- Eels, conger
speciation of galactins by adaptive evolution, 451
- Electron microscopy
wheat germ agglutinin binding in erythrocyte aging, 1
- Embryogenesis
hyaluronan in, 331
- Endocytosis
galectin-3 and, 527
- Endometriosis
peritoneal, haptoglobin glycosylation and overexpression in, 33
- Endometrium
ovarian steroids effects on glycosaminoglycans, 385
- Endotoxic shock
syndecan-4 in, 315
- Enzyme-linked immunosorbent assay (ELISA)
N-acetylglucosaminyltransferase III in chronic liver disease, PAb-mAb sandwich, 415
- Eosinophils
galectin-9 activation of, 597
- ErbB genes
epithelial-mesenchymal transformation in cardiac morphogenesis, 331
- Erythrocyte aging
wheat germ agglutinin distribution in, 1
- Escherichia coli*
enterotoxigenic strains in calves, milk oligosaccharide binding by, 5
- Estrogen
endometrial glycosaminoglycans and, 385
- Evolution, molecular
adaptive, speciation of conger eel galactins, 451
- Extracellular matrix proteins
galectin-3 modulation of, 527
hyaluronan and, 331
- F
- Fertility
bikunin in, 241
- Fibrillogenesis, collagen
decorin in, 249
- Fibroblasts, dermal
galectin-1 and development of, 615
- Fibromodulin
in knockout mice, 287
- Fimbrial adhesins
enterotoxigenic *E. coli*, 5
- Focal adhesions
syndecan-4 and, 305
- Frog, clawed
brain ganglioside structure, 53
UDP-GlcNAc transferases in, 187
- Frontal affinity chromatography-mass spectrometry, 175
- Fucosyltransferases
FUT1 expression in HT-29/M3 colon cancer cells, 13
intestinal mucin alterations from *Nippostrongylus brasiliensis* infections, 67
- G
- Galectin-1
in amyotrophic lateral sclerosis, 479
apoptosis and, 467
in cancer and metastasis, 471, 537
cell growth regulation, bifunctional, 467
cellular homeostasis and, 508
in kidney development, 623
in muscle development and regeneration, 615
nerve regeneration and, 480
oxidized, in adult mammalian nervous tissues, 479
in peripheral nerve injuries, 479
RNA splicing and, 499
structure-activity relationships, 479
thermodynamic binding specificity, 459
- Galectin-3
in angiogenesis, 544
anoikis and, 545
cell adhesion and, 530, 545, 576
cellular homeostasis and, 509
in diabetic nephropathy, 627
expression in cancer, 537
extracellular functions, 527
in innate immunity, 583
in kidney development, 624
in kidney inflammation, 626
neoplasm metastasis and, 543
nuclear biochemistry, 499
in organogenesis, 529
RNA splicing, 499
thermodynamic binding specificity, 459
- Galectin-7
cellular homeostasis and, 510
thermodynamic binding specificity, 459
- Galectin-8
apoptosis and, 510
- cell adhesion modulation, 517
complex formation with integrins, 517
isoforms and cancer, 557
RNA splicing and, 557
- Galectin-9
apoptosis and, 519, 598
cell adhesion modulation, 597
cell aggregation and, 597
cell differentiation and, 596
eosinophil activation, 597
isoforms, 491
in kidney development, 625
in physiological and pathological conditions, 593
as urate transporter, 491
- Galectin-12
cellular homeostasis and, 510
- Galectins. *See also* specific galectins
in *Anopheles gambiae*, 607
apoptosis and, 507, 565
autoimmunity and, 565
binding studies, thermodynamic, 459
in cancer, 537, 551, 557, 598
carbohydrate recognition domains, 434, 451, 527
cell growth and, 507, 517
cellular homeostasis, regulation of, 507
in *Drosophila melanogaster*, 607
extracellular functions, 510
gene expression regulation, 441
immune cell physiology and, 565, 575
inflammation and, 565, 575, 601
introduction to, 433
in kidney development, 621
in kidney disease, 625
Mac-2 binding protein and, 551
molecular evolution in conger eels, 451
nomenclature, 433
in parasite infection, 601
RNA splicing and, 499, 557
structure and specificity, 436
tissue distribution, 442
x-ray crystal structure, 451
- Gangliosides
cell density and subculture progression in human fibroblasts, 181
structure in *Xenopus laevis* brain, 53
- GD3 synthase
gangliosides in human fibroblasts, cell density and subculture progression, 181
- Gene expression
FUT1, apomucin glycosylation and, 13
galectins, in cancer, 537
galectins, regulation of, 441
- Gene sequencing
ST3Gal III, 197
- Gene trapping, secretory, 348
- GlcNAc-transferase II
in *Xenopus laevis*, 187
- N*-glycans
antibody production in
N-acetylglucosaminyltransferase III deficiency, 211
biosynthesis in *Xenopus laevis*, 187

- Glycobiology
developments in, 161
- Glycopeptides
antigens, T-cell hybridoma characterization, 59
O-glycosylation induced structural changes in calcitonin α -helix, NMR analysis, 43
- Glycosaminoglycans
biosynthesis, 230
in *C. elegans*, 325
function, 227
in ovine endometrium, ovarian steroids effects on, 385
structure, 228
in vulval morphogenesis, 325
- Glycosylation
calcitonin α -helix structural changes, NMR analysis, 43
haptoglobin, in peritoneal endometriosis, 33
intestinal mucin alterations from *Nippostrongylus brasiliensis* infection, 67
in kidney, developmental regulation of, 621
MUC1, airway epithelium vs. colon carcinoma cells, 379
- Glycosyltransferases
in *Xenopus laevis*, 187
- Glycyrrhetin
targeted delivery to hepatic stellate cells, 423
- Glypicans
gene mutations and function, 319
- Growth factors
syndecan-4 and, 309
- Growth inhibitors
galectin-1, 467
- H
- Haptoglobins
glycosylation and overexpression in peritoneal endometriosis, 33
- Heart
hyaluronan in morphogenesis, 331
- Hemagglutination
inhibition by milk oligosaccharides, 7
- Hemostasis
anticoagulant heparan sulfate in, 355
- Heparan sulfate
anticoagulant, 355
in growth factor signaling, 347
- Heparan sulfate proteoglycans
in *Drosophila* development, 363
glypicans, gene expression and function, 319
perlecan, in skeletal development and diseases, 263
syndecan-4 and cell signaling, 305
syndecans in transgenic organisms, 295
- Heparan sulfate 2-O-sulfotransferase (Hs2st)
mouse development and, 347
sulphation patterns, 349
- Heparan sulfate 3-O-sulfotransferase-1 (Hs3st1)
perinatal phenotypes and normal hemostasis in knockout mice, 355
- Heparin
plasma membrane Ca^{2+} -ATPase inhibition, 373
- Hepatic stellate cells
neoglycoprotein conjugates, targeted glycyrrhetin delivery to, 423
- Hepatitis
N-acetylglucosaminyltransferase III in, PAb-mAb sandwich assay, 415
- Hyaluronan
biology and genetics, 331
in carcinogenesis, 337
endometrial glycosaminoglycans and, 385
in epithelial-mesenchymal transformation, 336
in fertility, 241
function in mice, 341
human genetic disorders and, 338
in mammalian morphogenesis, 331
signaling via erbB genes, 331
- Hyaluronan synthase
alleles, 341
genetics, 331
targeted mutagenesis in mice, 341
- Hybridomas
T-cell, $\beta\text{Gal}(1-3)\alpha\text{GalNAc-O/Ser}$ (Core-1) response to, 59
- I
- IgG
N-linked oligosaccharides of, structure in Sjögren's syndrome, 23
- Immunity
danger model, 583
innate, galectin-3 and, 583
innate, insect galectins and, 607
self-nonsel self model, 583
- Infectious diseases
galectin-3 and innate immunity, 583
- Inflammation
galectins and, 565, 575
- Integrins
galectin-8 complex formation with, 517
- Interleukin-1 β
syndecan-4 suppression of, 315
- Ion channels
galectin-9, 491
- Islets of Langerhans
sulfatide expression in RIN-38 beta cells, 403
- K
- Keratan sulfate proteoglycans
corneal transparency and, 275
- Keratocan
corneal transparency and, 275
- Kidney diseases
galectins in, 625
- Knockout mice
aggrecan, 269
biglycan, 257
Den, 249
fibromodulin, 287
Hs2st, 347
Hs3st1, 355
keratocan, 275
link protein, 269
lumican, 275, 287
perlecan, 263
syndecan-4, 315
- L
- Lectins
Bradyrhizobium GN17 mutant characterization, 395
Marasmius oreades, recognizing blood group B trisaccharides, 175
sialylglycoconjugate detection, 165
- Leukocytes
galectin recruitment of, 575
- Link protein
knockout mice, chondrodysplasia in, 269
- Lipopolysaccharides
Bradyrhizobium GN17 mutant characterization, 395
- Liver cirrhosis
N-acetylglucosaminyltransferase III in, PAb-mAb sandwich assay, 415
targeted glycyrrhetin delivery to hepatic stellate cells for, 423
- Lumican
corneal transparency and, 275
function in knockout mice, 287
- M
- Mac-2 binding protein
in tumor progression and metastasis, 551
- Macrophages
galectins and physiology of, 569
- Mannose 6-phosphate
neoglycoprotein conjugates, targeted glycyrrhetin delivery to hepatic stellate cells, 423
- Marasmius oreades*
lectin recognition of blood group B trisaccharides, 175
- Mass spectrometry
frontal affinity chromatography, for blood group B trisaccharide recognition, 175
matrix-assisted laser desorption ionization, 211
- Mgat3* gene
polyclonal antibody production, 211
- Milk oligosaccharides
binding by bovine enterotoxigenic *E. coli* strains, 5
- Mitogenesis
galectin-1 and, 467
- Monoclonal antibodies
N-acetylglucosaminyltransferase III in chronic liver disease, PAb-mAb sandwich assay, 415
- MUC1 apomucins
glycosylation and FUT1 expression in colon cancer cells, 13
- MUC5AC apomucins
glycosylation and FUT1 expression in colon cancer cells, 13
- Mucins
intestinal, murine, *O*-glycosylation alterations from *Nippostrongylus brasiliensis* infection, 67
- MUC1, glycosylation in HT-29/M3 colon cancer cells, 13
- MUC1, *O*-glycosylation, airway epithelium vs. colon carcinoma cells, 379
- MUC5AC, glycosylation in HT-29/M3 colon cancer cells, 13
- Musculoskeletal diseases
biglycan knockout models, 257
- Mutagenesis
Bradyrhizobium GN17 strains, characterization, 395

- Myotonia
perlecan in, 263
- N
- Neoglycoproteins
conjugates, targeted glycyrrhethin delivery to hepatic stellate cells, 423
- Neoplasm metastasis
galectin-1 and, 471
galectin-3 and, 543
Mac-2 binding protein and galectins in, 551
- Neoplastic transformation
galectin-8 isoforms and, 557
- Nerve regeneration
galectin-1 and, 480
- Neuromuscular junction
perlecan in, 263
- Neutrophils
galectins and, 569, 575
- Nippostrongylus brasiliensis*
O-glycosylation alterations from intestinal mucins, in mice, 67
- Nuclear magnetic resonance (NMR)
O-glycosylation induced structural changes in calcitonin α -helix, 43
- O
- Obesity
syndecan shedding in, 296
- Obituaries
Bernfield, Merton, 225
- Oligosaccharides
intestinal mucin alterations from
Nippostrongylus brasiliensis infections, 67
milk, binding by bovine enterotoxigenic *E. coli* strains, 5
N-linked, in Sjögren's syndrome, 23
- Osteoporosis
in biglycan knockout mice, 257
- Overgrowth syndromes
glypican-3 mutations and, 319
