

International Symposium on Microchemical Techniques - 1965

August 22 - 27, 1965

Conducted by the PENNSYLVANIA STATE UNIVERSITY at University Park, Pennsylvania, U.S.A., the program is being organized by the American Microchemical Society with the sponsorship of IUPAC.

It is hoped to have sessions on: (1) micro methods in structural elucidation; (2) micro techniques in peptide studies; (3) clinical and forensic analysis; (4) novel micro and ultramicro approaches in organic elemental analysis; (5) micro techniques with high-energy materials; (6) novel micro separation methods; (7) inorganic microanalysis and trace analysis; (8) micro methods in air and water pollution studies; (9) determination of physical properties with small samples; (10) education for instrumentation; (11) general papers.

1. All correspondence regarding papers (or general information) should be directed to: Mr. HOWARD FRANCIS JR., Vice-Chairman, Intern. Sym. Microchem. Techniques - 1965, c/o Pennsalt Chemicals Corp., 900 First Ave., King of Prussia, Pennsylvania, U.S.A.

2. A descriptive title and an abstract must be received by January 31, 1965, and the text of the paper by April 31, 1965.

3. The abstract of not more than 300 words (without unusual symbols and complex mathematical formulae) preferably in English, should be submitted in an original and two carbon copies. It should make clear to an expert in the relevant field the novelty of the findings being presented. The edited abstract will appear in the Symposium program. The names of the author or authors should be given along with the name and address of the company or institution at which the work was performed. If the present address of any author is different, both addresses should be given.

4. The letter of transmittal of the abstract should contain the following information: (a) the name of the person who will present the paper in the case of multiple authors; (b) a statement that the paper in substance or essence has not or will not be submitted for publication elsewhere; (c) the language of the oral presentation (English being preferred); (d) the estimated presentation time (not to exceed 25 minutes with 5 additional minutes for discussion); (e) the size of lantern slides, either 3.5 by 4.0 in. (8.9 by 10.2 cm) or 2.0 by 2.0 in. used with 35-mm transparencies; (f) any special facilities wanted.

5. The right of original publication of all research papers contributed to the Symposium is reserved by the *Microchemical Journal* with the sole exception of the plenary lectures which will be published in the IUPAC journal, *Pure and Applied Chemistry*.

6. The full text of the paper with illustrations must be submitted in duplicate. Each manuscript will be acknowledged on receipt and will be placed in type for appearance in issues of the *Microchemical Journal* to be mailed directly following the Symposium. Papers should conform in organization to the practices of that Journal as described on the page entitled "Information to Authors"; copies of that page are available on request.
