

The Chemical Society (London) 6th Autumn Meeting 1970

Department of Mechanical Engineering at Imperial College, London, S.W. 7,
from 29th September to 1st October

Scientific Programme: Symposium 1 (2 days): 'Physical and Organic Aspects of Molecular Rearrangements' to include all aspects of the mechanism and scope of organic molecular rearrangements.

Symposium 2 (1½ days): 'New Developments in the Chemistry of Group III Elements' to include the recent chemistry of the elements boron, aluminium, gallium, indium and thallium.

Special sessions within the framework of the meeting: Group 1 (2 days): E.S.R., Group 2 (1 day): Heterocyclic, Group 3 (2 days): Mössbauer, Group 4 (2 days): N.M.R.: Theme 1: N.M.R. Spectroscopy of Nuclei other than Hydrogen; Theme 2: N.M.R. Spectroscopy of Large Molecules, Group 5 (1 day): Protein – Recent Developments in In munochemistry.

Plenary Lectures: Faraday Lecture: Dr. G. Herzberg, National Research Council of Canada, Ottawa.

Symposium 1: Professor R. Huisgen, University of Munich, W. Germany.

Symposium 2: Professor H. Nöth, University of Munich, W. Germany.

Contributed Papers: Contributions are invited in respect of the two symposia and the five group sessions. Anyone wishing to present a communication should apply not later than 1st July, 1970 on forms available from the Chemical Society.

Further particulars of the meeting will be available in August, and these will be sent to those who have notified their interest in the meeting by returning a special form (to be obtained from Dr. John F. Gibson) to Dr. John F. Gibson, The Chemical Society, Burlington House, London W1V OBN.
