

## Prix Grammaticakis-Neumann in Photochemistry

In 1987, a Prize from the Grammaticakis-Neumann Fund of the European Photochemistry Association, Section Switzerland (EPA-CH), will be awarded to a young research scientist for outstanding contributions in the field of photochemistry. The award followed by the lecture of the prize-winner is scheduled for the joined Annual Meeting of the Swiss and the Italian Sections of the EPA from September 14 to 16, 1987 in Como, Italy.

Nominations or applications including Curriculum vitae, list of publications, reprints, and preprints are invited, to be submitted to the President of the Jury

PD Dr. André M. Braun  
Institut de chimie physique  
EPFL, Ecublens  
CH-1015 Lausanne

before January 31, 1987.

# Basic Organometallic Chemistry

**Hardcover edition:** 1985. XXVIII, 488 pages. Numerous illustrations.

Containing comprehensive bibliography.

DM 169,-; approx. US \$76.80 ISBN 3 11 007184 3

**Paperback edition:** 1985. XXVIII, 376 pages. Numerous illustrations.

DM 79,-; approx. US \$35.90 ISBN 3 11 010548 9

Published in hardcover and paperback versions, **Basic Organometallic Chemistry**, is the first up-to-date general introduction to this important interdisciplinary subject. It includes the basic facts and concepts. Emphasis is placed on the syntheses, structures and reactions of the organometallic compounds of both the main group as well as the transition metals. Chapters on bonding and laboratory techniques open the discussion, which then proceeds through the main-group elements by group and through the transition metals by ligand type.

The **hardcover version** contains a complete and up-to-date annotated bibliography of textbooks, monographs, serial publications, and review articles. This version will be indispensable to the advanced student and research worker in the field.
