

Erratum

Helv. Chim. Acta **1986**, 69, 955, by R. Benken, K. Finneiser, H. v. Puttkamer, H. Günther, B. Eliasson, and U. Edlund:

There is an error in the $\Delta\delta(^1\text{H})_p$ values for biphenylene dication calculated on the basis of Eqn. 2 (Table 3). The correct data are 3.96 and 5.89 ppm. These values are unrealistically large and lead to unacceptable ring current contributions. Our conclusions with respect to the results of Eqn. 2 are thus not justified.

We are indebted to Prof. Dr. K. Müllen for focussing our attention on this error.
