## The Roussel Prize 1990

In view of the ever growing importance of steroids in therapeutic medicine, the Roussel Uclaf Group created in 1968 an international Prize intended to encourage research in this particular area.

The Prize is awarded every two years to a chemist, biochemist or physiologist whose work has been selected as the most outstanding by an international committee of distinguished scientists.

The next Roussel Prize (\$20,000), which is scheduled in April 1990, is intended to reward one or more researchers for outstanding work on steroids and other squalenoids published before September 30th, 1989.

The composition of the Jury for the year 1990 is as follows: President: Sir Derek Barton; Members: Professors M. Akhtar, J. Gorski, N. Ikekawa, J. Mathieu, G. Quinkert, C.J. Sih.

Candidates for the Prize may be of any nationality and from any laboratory.

Nominations should be put forward by a person of high scientific standing, by means of the appropriate form bearing the names of two referees and addressed to the President of the Jury or to the Secretariat of the Roussel Prize, before October 1st, 1989.

Forms and any further information may be obtained from the Secretariat on request.
