|  | 85  | Contributors to this Issue   |
|  | 86  | Graphical Abstract   |
| Jean-Christophe Legeay, Daniel Carrié, Ludovic Paquin, Jean Jacques Vanden Eynde, and Jean Pierre Bazureau | 91  | Synthesis and application of ionic liquid phase-supported $\beta$ -aminocrotonate for access to asymmetric 1,4-dihydropyridines.   |
| Miao Yang, Qingshan Liu, Peifang Yan, Xiumei Liu, Urs Welz-Biermann  | 97  | Multiple Cobalt Phosphate Ring System from 1-Alkyl-3-Methylimidazolium Tetrafluoroborate Ionic Liquids   |
| Shun Noritake, Norio Shibata, Hiroyuki Kawai, Manoj Kumar Pandey, Shuichi Nakamura, Takeshi Toru           | 105 | Ionic liquids as media for nucleophilic ring opening fluorination of aziridines  |
| B. Sunil kumara, Raveendra K. Hunnur, K.Mallikarjun Reddy, R. H. Udupia and V. Hima bindub.                | 115 | A facile and efficient method for the synthesis of bis(indolyl)methanes catalyzed by selectfluor <sup>TM</sup> under conventional heating and microwave irradiation              |
| Debasish Bandyopadhyay, Antara Banik, Sahil Bhatta and Bimal K. Banik                                      | 121 | Microwave-Assisted Ruthenium Trichloride-Catalyzed Synthesis Of Pyrrole Fused With Indole System In Water  |
| Mariusz Mojzych, Aldona Raszkievicz and Lucjan Strekowski  | 123 | Facile Synthesis Of Dimeric Heptamethine Cyanine Dyes Containing A Linker At The Meso Positions  |
| Vandana Ankodia, Praveen Kumar Sharma, Kailash Sharma, and M. Kumar* and Archana Gupta                     | 127 | Regioselective OnePot Synthesis Of 5-Chloro-3-Methyl- 8-Trifluoromethyl-4H-1, 4-Benzothiazines   |
| S.Verma, K.Arora, D.Jose, R.Joshi, P.Pardasani and R.T. Pardasani  | 135 | Regioselective Synthesis Of Azabicycloadducts Derived From Benzo[B]Thiophene -2, 3 -Dione and Pipecolinic Acid   |
| Jyoti Joshi, Bidya S.Joshi and (late)B.C. Joshi  | 141 | Triazolo derivatives of dibenzodiazepines as potential c.n.s. Active drug  |
| Rajni Gupta and Vandana Gupta  | 147 | Synthesis And Spectral Studies Of Nitrosourea Derivatives Of Benzyl - 3-Methyl- 5/7 Substituted 4H-1, 4-Benzothiazine -2-Carboxylates As Possible Bifunctional Anticancer Agents |
