

Correction to Synthesis, Structure, and H₂/CO₂ Adsorption in a Three-Dimensional 4-Connected Triorganotin Coordination Polymer with a sqc Topology

Vadapalli Chandrasekhar,* Chandrajeet Mohapatra, Rahul Banerjee,* and Arijit Mallick

Inorg. Chem. **2013**, *52* (7), 3579–3581. DOI: 10.1021/ic302528b

Page 3580. The authors would like to correct and clarify a mistake in the topological analysis of $[(\text{Me}_3\text{Sn})_4(\mu\text{-LH})_2]_n$ (**1**). In the title, abstract, and text, it was mentioned that **1** has sqc topology. The correct topology of the compound is lvt instead of sqc. We acknowledge Prof. Michael O’Keeffe (Arizona State University, Phoenix, AZ) for bringing this to our attention.
