# Additions and Corrections

1984, Volume 23

**W. G. Jackson* and C. M. Begbie**: Steric Course of Base Hydrolysis of *cis*- and *trans*-$[Co(en)_2(N_3)X]^{n+}$ and *cis*- and *trans*-$[Co(en)_2(NCS)X]^{n+}$ ($X = Br^-$, $Cl^-$, $OS(CH_3)_2$, $OCHN(CH_3)_2$, $N_3^-$, $O_2CH^-$).

Page 667. The following was omitted inadvertently: **Acknowledgment**. This work was supported by the Australian Research Grants Scheme.—W. G. Jackson

**W. G. Jackson* and C. N. Hookey**: Base Hydrolysis of $[(NH_3)_5CoX]^{n+}$. Capture of Sulfur and Nitrogen of the Thiocyanate Ion.

Page 669. In column 2, first new paragraph, second line, 30 × 20 mL should read 3 × 20 mL.

Page 673. The following was omitted: **Acknowledgment**. We thank the Australian Research Grants Scheme for financial support.—W. G. Jackson

**Mark E. Frink, Douglas Magde, Douglas Sexton, and Peter C. Ford***: Reaction Dynamics and Hydroxide Ion Quenching of Rhodium(III) Ligand Field Excited States: Photoreactions of $Rh(NH_3)_5I^{2+}$.

Page 1239. In the caption to Figure 2 "◇, $\phi_I^0/\phi_I$" is incorrect. The correct caption should read as follows: ◇, $\phi_{tot}^0/\phi_{tot}$. Also, in Figure 2 the diamond (◇) curve is incorrectly labeled as $I^-$. The correct label is $\phi_{tot}$. For clarification of Figure 2, the following addition should be made: $\phi_{tot} = \phi_I + \phi_{NH_3}$.—Peter C. Ford

**Brian F. G. Johnson,* Jack Lewis, Julian M. Mace, Paul R. Raithby, Robert E. Stevens, and Wayne L. Gladfelter***: Decacarbonylnitrosyltriosmate(3 *Os–Os*)(1−): Structural Analysis and Fluxional Properties.

Page 1602. In the section titled "Variable-Temperature $^{13}C$ NMR", the value of the $^{13}C$–$^{13}C$ coupling constant should be 35.0 Hz.—Wayne L. Gladfelter
