**Shayne J. Landon and Thomas B. Brill\***: The Effect of  $X^- = Cl^-$ ,  $Br^-$ ,  $I^-$  on the Kinetics of the Arbusov Rearrangement Involving  $[CpCo(dppe)X]^+$  and  $P(OR)_3$  ( $R = Me, Et$ ).

Page 4178. In Table I, there should be changes in the following values.  $k_{obsd}$ :  $Br^-$  (30 °C), 1.6 (0.3);  $I^-$  (0 °C),  $7.2 (0.6) \times 10^{-2}$ .  $k_2$ :  $Br^-$  (30 °C),  $3.0 (0.4) \times 10$ ;  $I^-$  (0 °C),  $9.9 (1) \times 10^{-1}$ ;  $I^-$  (20 °C), 5.9 (0.5).

Page 4179. In Table II, the value of  $k_2$  for  $R = Me$  should be 5.9 (0.5). Also, the values in Table III should be replaced with the following:

$X^-$	$\Delta H^\ddagger$ , kcal mol <sup>-1</sup>	$\Delta S^\ddagger$ , eu
$Cl^-$	27 (4)	36 (8)
$Br^-$	24 (4)	26 (7)
$I^-$	14 (4)	-8 (4)

These corrections, necessitated by computational errors, will alter several of the conclusions, and a note to this effect will follow.—Thomas B. Brill
