

2006, Volume 45

Nicolle C. Habermehl, Patricia M. Angus, Nathan L. Kilah, Lasse Norén, A. David Rae, Anthony C. Willis, and S. Bruce Wild*: Asymmetric Transformation of a Double-Stranded, Dicopper(I) Helicate Containing Achiral Bis(bidentate) Schiff Bases

Pages 1445–1462. We regret that we did not cite earlier work concerning the synthesis and characterization of the complexes $[\text{Cu}_2(\mathbf{1a})_2]\text{X}_2$ ($\text{X} = \text{PF}_6, \text{ClO}_4$) and the crystal structure of the latter (Pal, P. K.; Chowdhury, S.; Purkayastha, P.; Tocher, D. A.; Datta, D. *Inorg. Chem. Commun.* **2000**, 3, 585–589). The authors are thankful to Professor Datta for pointing out this oversight.
