Shaojun Guo and Erkang Wang*: One-Pot, High-Yield Synthesis of Size-Controlled Gold Particles with Narrow Size Distribution

Page 6741. In the Experimental Section, the last line should read as follows: “First, 2 mL of 25 mM H₂AuCl₄ aqueous solution and 1 M PVP aqueous solution with the initial molar ratios of 20:1, 5:1, and 1:1 of PVP to gold (corresponding to samples 1, 2, and 3, respectively) were placed in a small beaker.”

Page 6741. The caption of Figure 1 should be changed to “Typical FE-SEM images of sample 1 (PVP to gold ratio of 20:1) ...”.

Page 6742. The caption of Figure 2 should be changed to “XRD (A) and XPS pattern (B) of sample 1 (PVP to gold ratio of 20:1) ...”.
