

Additions and Corrections

1995, Volume 34

Cynthia K. Schauer,* Suzanne Harris,* Michal Sabat, Eric J. Voss, and Duward F. Shriver*: Synthesis, Structure, and Bonding of the Butterfly Cluster Containing the μ_4 -Oxo and μ_4 -Sulfido Ligands: $[(PPh_3)_2N][Fe_3M(CO)_{12}(\mu_4-E)]$ (E = O, S; M = Mn, Re).

Pages 5017–5028. The crystals of $[(PPh_3)_2N]5$ (E = S, M = Mn) should be described in the monoclinic space group $C2/c$ ($a = 16.028(2)$ Å, $b = 15.996(2)$ Å, $c = 18.214(2)$ Å, $\beta = 90.73(1)^\circ$). The new coordinates in $C2/c$ become $x' = (1/2)(x - z)$, $y' = (1/2)(x + z)$, $z' = -y$. A crystallographic 2-fold axis passes through the μ_4 -S atom. There are no significant changes in the reported bond distances and angles. We thank Richard Marsh for bringing this error to our attention.
