Christelle Hureau, Sihem Groni, Régis Guillot, Geneviève Blondin,*
 Carole Duboc, and Elodie Anxolabéhère-Mallart*: Syntheses, X-ray
 Structures, Solid State High-Field Electron Paramagnetic Resonance,
 and Density-Functional Theory Investigations on Chloro and Aqua Mn^{II}
 Mononuclear Complexes with Amino-Pyridine Pentadentate Ligands

Page 9240. In the Material and Methods section, describing
 the synthesis of ligands L₅² and L₅³, the first step of the
 synthesis of L₅² and L₅³ ligands was performed in methanol
 and not in diethylether. The correct sentence should be as
 follows:

Step 1: Synthesis of aminal (B² and B³). Twenty
 millimoles of A² (respectively A³) were dissolved in 100
 mL of methanol.

The correct Scheme 1 is as follows:

Scheme 1
