Page 7336. The Computational Details section is incorrect and should read as follows: All DFT calculations were performed using the Gaussian 09 package<sup>16</sup> using the B3LYP hybrid functional<sup>17</sup> and the DZVP basis set for all atoms.<sup>18</sup> Closed- and open-shell species were optimized using the spin-restricted and spin-unrestricted MO formalism, respectively. Tight SCF convergence criteria were used for all calculations. The converged wave functions were tested to confirm that they correspond to the ground-state surface.
