

New planar quinquedentate macrocycles which contain pyridine donor atoms.	
The X-ray structure determination of {8,15-dihydro-2,6-dimethyltripyrrodo [c,d:i,j:l,m] [1,4,7,8,10,13,15]-heptaazapentadecin-N ¹ ,N ^{2b} ,N ⁷ ,N ^{8b} ,N ¹² } diaquozinc(II) dinitrate	L21
Z. P. Haque, D. C. Liles, M. McPartlin and P. A. Tasker (London, U.K.)	
Molecular complexes of organic carbonates with Lewis acids	
C. Busetto, U. Melis, U. Romano and G. Santi (San Donato Milanese, Italy)	
Synthesis of a new carbonyl derivative containing Fe and W metals	L26
V. N. Pandey (Gorakhpur, India)	
Some binuclear bis(diphenylphosphino)methane complexes of platinum with bridging and terminal hydrido groups	L27
M. P. Brown, R. J. Puddephatt and M. Rashidi (Liverpool, U.K.) and K. R. Seddon (Oxford, U.K.)	
X-ray photoelectron spectroscopy of Ga metal and Ga chalcogenides	L29
C. P. Srivastava, D. F. van de Vondel and G. P. van der Kelen (Ghent, Belgium)	
Rate constants of the permanganate oxidation of dimethylmaleic acid and dimethylmaleic anhydride	L31
Z. Szerverenyi, L. I. Simandi and M. Jaky (Budapest, Hungary)	
Bis- μ -[bis(diphenylphosphino)methane]-bis(chloro-platinum) (Pt-Pt): its molecular structure and the reversible addition of carbon monoxide to the Pt-Pt bond	L33
M. P. Brown, R. J. Puddephatt and M. Rashidi (Liverpool, U.K.), Lj. Manojlović-Muir, K. W. Muir and T. Solomun (Glasgow, U.K.) and K. R. Seddon (Oxford, U.K.)	
Methylaminobis(difluorophosphine) as a monoligand monometallic ligand	L35
R. B. King, M. G. Newton, J. Gimeno and M. Chang (Athens, Ga., U.S.A.)	
A new isomer of molybdenum(IV) chloride	L37
A. D. Westland and V. Uzelac (Ottawa, Canada)	

Erratum to Volume 22

In the final correction stage before passing issue 22/2 for press, the article by D. W. Clack and M. Monshi (*Inorganica Chimica Acta*, 22 (1977) 261–264) was dotted with an incorrect title which subsequently has appeared in print. The publishers offer their apologies to the authors and readers for this mistake. The correct title is reproduced below.

Molecular Orbital Calculations on Transition Metal Complexes. Part XV*. Ground Electronic Configurations and Low Energy $d \rightarrow d$ Transitions in Cobalt and Iron Phthalocyanines

D. W. CLACK and M. MONSHI

Department of Inorganic Chemistry, University College, P.O. Box 78, Cardiff, Wales, U.K.
