

Corrigenda

Inorganica Chimica Acta, 78 (1983) L51–L53

Complexation of Pd(II) with Nucleosides. Evidence for a Strong Interaction Pd···HN by NMR

D. CAMBOLI, J. BESANCON, J. TIROUFLET, B. GAUTHERON and P. MEUNIER (*Dijon, France*)

Page L51, r.h. column, para. 6, line 15 the reference should be [5].

Page L53, under **References**, ref. 5 should read:

5 M. Postel, M. Pfeffer and J. G. Riess, *J. Am. Chem. Soc.*, 99, 5623 (1977).

Inorganica Chimica Acta, 78 (1983) 275–279

Cadmium Binding to Metal-free Metallothionein: a Correlation of UV, CD and ^{113}Cd NMR Data and a ^{113}Cd NMR Characterization of the Binding Sites in the Reconstituted Protein

P. A. W. DEAN, A. Y. C. LAW, A. SZYMANSKA and M. J. STILLMAN (*London, Ont., Canada*)

Page 276, l.h. column, under *Spectroscopic Measurements*, the ^{113}Cd nmr repetition rates for the native and reconstituted protein should be 25 min^{-1} and 28 min^{-1} respectively and not 2.5 s^{-1} and 8 s^{-1} .
